General description

FLIR ResearchIR Max + HSDR 4 contains all the features of FLIR ResearchIR Max 4, plus support for FLIR High Speed Data Recorder (HSDR) products.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max + HSDR 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description

FLIR ResearchIR Max + HSDR 4 contains all the features of FLIR ResearchIR Max 4, plus support for FLIR High Speed Data Recorder (HSDR) products.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max + HSDR 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description

FLIR ResearchIR Max + HSDR 4 contains all the features of FLIR ResearchIR Max 4, plus support for FLIR High Speed Data Recorder (HSDR) products.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max + HSDR 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description

FLIR ResearchIR Max 4 is aimed at R&D and science professionals who use thermal imaging cameras with a cooled or uncooled detectors. FLIR ResearchIR Max makes the most of a thermal imaging camera, and allows high-speed recording and advanced thermal pattern analysis. FLIR ResearchIR Max is the perfect tool for industrial R&D.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description

FLIR ResearchIR Max 4.0 is aimed at R&D and science professionals who use thermal imaging cameras with a cooled or uncooled detectors. FLIR ResearchIR Max makes the most of a thermal imaging camera, and allows high-speed recording and advanced thermal pattern analysis. FLIR ResearchIR Max is the perfect tool for industrial R&D.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

Shipping information

Packaging, type	Cardboard box
List of contents	FLIR ResearchIR Max 4 download card, incl. license key.
Packaging, weight	0.066 kg (0.15 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558010457
UPC-12	845188011109
Country of origin	Sweden

Compatible with the following products:

- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°
- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)
- 55903-1016; FLIR T600 25° (incl. Wi-Fi and Ext. cal.)
- 55903-1022; FLIR T600 25° (incl. Wi-Fi)
- 55903-1007; FLIR T600 25° and 15° w/case
- 55903-1008; FLIR T600 25° and 45° w/case

General description
FLIR ResearchIR Max 4 is aimed at R&D and science professionals who use thermal imaging cameras with a cooled or uncooled detectors. FLIR ResearchIR Max makes the most of a thermal imaging camera, and allows high-speed recording and advanced thermal pattern analysis. FLIR ResearchIR Max is the perfect tool for industrial R&D.
Main features:
<ul style="list-style-type: none"> • Pre/post-recording. • Mathematical processing toolbox. • Image filtering toolbox. • Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy. • View, record and store images at high speed. • Post-processing of fast thermal events. • Generate time-temperature plots from live images or recorded sequences. • Advanced start/stop recording conditions. • Unlimited number of analysis functions (spot, line, area). • File organizer. • Zoom and pan allows a closer look. • Multiple dockable objects for plots and statistics. • Export images and results to bitmap, video, Excel, MATLAB or CSV formats • Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.
FLIR ResearchIR Max 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

Shipping information	
Packaging, type	Cardboard box
List of contents	FLIR ResearchIR Max 4 download card, incl. license key.
Packaging, weight	0.066 kg (0.15 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558010488
UPC-12	845188011130
Country of origin	Sweden

Compatible with the following products:

- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°
- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)
- 55903-1016; FLIR T600 25° (incl. Wi-Fi and Ext. cal.)
- 55903-1022; FLIR T600 25° (incl. Wi-Fi)
- 55903-1007; FLIR T600 25° and 15° w/case
- 55903-1008; FLIR T600 25° and 45° w/case

General description	
FLIR ResearchIR Standard 4.0 is aimed at the R&D benchtop testing environment for users of uncooled cameras. FLIR ResearchIR Standard provides the core analysis tools needed for rapid testing and assessment of thermal issues.	
Main features:	
<ul style="list-style-type: none"> • View live imagery from the camera • Record snapshots or movies to disk. • Post-processing of fast thermal events. • Generate time-temperature plots from live images or recorded sequences. • Analysis by region (spot, line, area). • File organizer. • Zoom and pan allows a closer look. • Multiple dockable objects for plots and statistics. • Export images and results to bitmap, Excel, or CSV formats 	
FLIR ResearchIR Standard 4 in combination with a FLIR thermal imaging camera is the perfect solution for any benchtop testing application application.	

Shipping information

General description	
FLIR Tools Mobile is an intuitive Android app for analyzing, managing, and distributing infrared images.	
Key features:	
<ul style="list-style-type: none"> • Remote control • MSX • Images with sketch on DC and IR • Images with field of view follow • Editable text comments • Emissivity table • Import images from your Wi-Fi-enabled camera. • Connect and stream infrared images from the camera. • Connect and stream measurement data from FLIR Test & Measurement meters • Lay out and move measurement tools on the image. • Read out temperature measurements. • Create and configure temporal plots based on results of measurement tools on the infrared image. • Log measurement data and export it as a *.csv file. • Save a measurement scenario as a data snapshot. • Zoom in on images. • On the Android device, remotely take snapshots when a camera is connected. • On the camera, take snapshots that will automatically be saved on the Android device. • Delete images on the Android device. • Display an image's GPS coordinates on Google Maps. • Create and e-mail reports. • Save images in the Android device photo library. • Send images to FTP sites and other file-sharing services (Dropbox, Box.net, etc.). • Display image information, e.g., object parameters, text comments, and file details. • Play back voice comments. • Change the level and span. • Change general settings in the app. • Change the palette. 	
Download	
The application can be downloaded from Android Market or Amazon Marketplace, see the link below.	
https://market.android.com/details?id=com.flir.viewer	
Release notes	
Version	3.8.0
New features	Main improvements in version 3.8.0: <ul style="list-style-type: none"> • Fixed loading of Japanese help files. • Fixed import bug for Samsung S6. • Fixed opening image taken from CAT S60. • Support for Ex, C3, and the new Exx cameras. • Import from Work folders. • Area measurement and length measurement feature based on object distance. • Various bug fixes.

<p>General description</p> <p>FLIR Tools Mobile lets professional thermographers use an iPad, iPhone, or iPod touch to see and capture live, streaming infrared video and stills from select FLIR cameras.</p> <p>With FLIR Tools Mobile the camera can be stationed in one area and operated wirelessly from another – highly useful for IR inspections of energized equipment or performing IR surveys in hard-to-reach locations and harsh working environments. Streaming video and remote access also gives decision makers and others on your team a valuable opportunity to observe and collaborate in the thermal imaging process.</p>
<p>Using FLIR Tools Mobile, you can do one or more of the following:</p> <ul style="list-style-type: none"> • Import images from your infrared camera • Lay out and move measurement tools on the image • Read out temperature measurements • Zoom in on images • On the iPhone/iPad, remotely take snapshots when a camera is connected • On the camera, take snapshots that will automatically be saved in the iPhone/iPad • Delete any images on the iPhone/iPad • Display an image's GPS coordinates on Google Maps • Create and e-mail imagesheets • Create and e-mail reports • Print imagesheets and reports to any AirPrint-enabled printer • Save images to iPhone/iPad photo library • Send images to FTP sites and other file sharing services (Dropbox, Box.net, etc.) • Display image information, such as object parameters, text comments, file information, etc. • Play-back voice comments • Change level and span • Change general settings in the app • Change palette
<p>FLIR Tools Mobile lets you take control of the following features on selected cameras:</p> <ul style="list-style-type: none"> • Remote control of your FLIR camera. • Support for MSX (Multi-Spectral Dynamic Imaging) images. • Support for sketch images in both IR and visual with on/off toggling. • Support for same FOV ("Field of View Match"). • Editable text comments. • Auto and manual focus • Level and span • Color palettes • Temperature measurement analytics • Spot • Area box • Circle • Line • Parameter settings • Emissivity • Reflected temperature • Relative humidity • Atmospheric temperature • IR and visible light image blending • Picture-in-picture • Thermal fusion • Image storage • MPEG 4 video • Radiometric JPEG stills

Release notes	
Version	1.8.2
New features	Main improvements in version 1.8.2: Various bug fixes.

System requirements	
Operating system	• iOS 8.0 or later
Hardware requirements	• iPhone • iPad • iPod

Compatible with the following products:

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°
- 72502-0503; FLIR T1010 45°
- 72501-0101; FLIR T1020 12°
- 72501-0102; FLIR T1020 28°
- 72501-0104; FLIR T1020 28° and 12°
- 72501-0105; FLIR T1020 28° and 45°
- 72501-0106; FLIR T1020 28°, 12°, and 45°
- 72501-0103; FLIR T1020 45°
- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0301; FLIR T1040 12°
- 72501-0302; FLIR T1040 28°
- 72501-0303; FLIR T1040 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°

General description	
A narrow FOV is used in applications where the object that is going to be monitored is remote from the Camera or when the Camera needs to be far away from the object due to for an example high temperatures.	

Imaging and optical data	
Field of view (FOV)	6° x 4.5°
Minimum focus distance	4 m (13.11 ft.)
Focal length	76 mm (3.0 in.)
Spatial resolution (IFOV)	0.33 mrad
F-number	1.3
Number of lenses	3 (3 asph)
MTF @ 70% of FOV	Normal requirements (52%)
Distortion	3%
Lens note	This lens must be calibrated in a service location if sold separately, otherwise the image will be upside-down.

Physical data	
Weight	Lens: 0.328 kg (0.723 lb.) Support: 0.11 kg (0.243 lb.)
Size (L x D)	106 x 89 mm (4.17 x 3.48 in.), excluding support

General description	
This device is a viewport which consist of a crystal "glass" window, mounted in an aluminum frame. The glass is specially formulated to allow transmission of infrared light to allow use of infrared thermal sensing equipment without opening the enclosure. This device is intended for installation in doors or walls of electrical enclosures without compromising the integrity of the enclosure.	
Power system	
Voltage	Any range
Environmental data	
Environment	Indoor/outdoor type 4/12
Operating temperature range	Maximum: 260°C (500°F)
Storage temperature range	Optics, maximum: 1357°C (2474°F)
Physical data	
Size (L x W x H)	25.5 x 73 x 86 mm (1.0 x 2.87 x 3.36 in.)
Viewing aperture diameter	45 mm (1.77 in.)
Material	Optics: CaF2 (Calcium Fluoride Crystal) Body: Anodized aluminum Hardware: steel
Comments to physical data	Required hole diameter, nominal: 60.3 mm (2.375 in.) Greenlee Punch: 76BB Maximum pullout strength: 658 kg (1450 lb.)
Lens	
Waveband	Broadband IR: short-, mid-, and longwave
Visible light spectrum	Yes
Certifications	
Certification	UL, IP67, NEMA Type 4/12, CSA

General description

This device is a viewport which consist of a crystal "glass" window, mounted in an aluminum frame. The glass is specially formulated to allow transmission of infrared light to allow use of infrared thermal sensing equipment without opening the enclosure. This device is intended for installation in doors or walls of electrical enclosures without compromising the integrity of the enclosure.

Power system

Voltage	Any range
---------	-----------

Environmental data

Environment	Indoor/outdoor type 4/12
Operating temperature range	Maximum: 260°C (500°F)
Storage temperature range	Optics, maximum: 1357°C (2474°F)

Physical data

Size (L x W x H)	26.9 x 99 x 107 mm (1.05 x 3.89 x 4.22 in.)
Viewing aperture diameter	69 mm (2.71 in.)
Material	Optics: CaF ₂ (Calcium Fluoride Crystal) Body: Anodized aluminum Hardware: steel
Comments to physical data	Required hole diameter, nominal: 88.9 mm (3.5 in.) Greenlee Punch: 739BB Maximum pullout strength: 1656 kg (3650 lb.)

Lens

Waveband	Broadband IR: short-, mid-, and longwave
Visible light spectrum	Yes

Certifications

Certification	UL, IP67, NEMA Type 4/12, CSA

General description

The Extended Warranty Package covers parts and labour for your IR camera, consumables not included.

FLIR Systems warrants its products to be free from defects caused by faulty material or poor workmanship, for a period specified above. **NO PRODUCT IS WARRANTED TO BE MERCHANTABILITY OR FIT FOR ANY PARTICULAR USE OR APPLICATION.** The warranty is void if the buyer damages the item due to misuse, abuse, modification, processing, or integration with other items. FLIR Systems' maximum liability under this warranty is limited to the obligation to replace or, at its sole option, to credit Buyer's account up to the purchase price.

Part name	IRW-4S
Material number	19252-200
Part description	Stainless steel IR window, 4" diameter
<p>This device is a viewport that consist of a crystal "glass" window mounted in an aluminum frame. The glass is specially formulated to allow transmission of infrared (IR) light to allow use of IR thermal sensing equipment without opening the enclosure. This device is intended for installation in doors or walls of electrical enclosures without compromising the integrity of the enclosure.</p>	

Power system	
Voltage	Any range

Environmental	
Environment	Indoor/outdoor type 4/12
Operating temperature range	Maximum: 260°C (500°F)
Storage temperature range	Optics, maximum: 1357°C (2474°F)

Certifications	
Certifications	UL, IP67, NEMA Type 4/12, CSA

Physical data	
Weight:	1.18 kg (2.6 lb.)
Dimensions (H x W x L)	26.9 mm x 99 mm x 107 mm (1.05" x 3.89" x 4.22")
Material	Optics: CaF ₂ (calcium fluoride crystal). Body: stainless steel AISI 316. Hardware: steel
Color	Metallic silver

Lens	
Waveband	Broadband IR: short-, mid-, and longwave
Visible light spectrum	Yes

Shipping information	
Packaging type	Color box
Packaging contents	<ul style="list-style-type: none"> IR window Case Mounting instruction Additional safety screw
Unit weight	1.32 kg (2.9 lb.)

SS IR window 4"

General description

This cable is used to transfer video signals from the infrared camera to an external monitor, or to a computer featuring an internal video card.

Physical data

Cable length	1.9 m (6.2 ft.)
Connector	3.5 mm (four pin) plug to RCA (red, white, yellow)

Shipping information

Packaging, type	Cardboard box
Packaging, weight	168 g (5.9 oz.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558006269
UPC-12	845188006617
Country of origin	Sweden

Compatible with the following products:

- 64502-0801; FLIR E33
- 64502-1001; FLIR E40
- 64501-0101; FLIR E40 (incl. Wi-Fi)
- 64501-0103; FLIR E40 with SC kit (incl. Wi-Fi and 45° lens)
- 64501-0114; FLIR E40 with SC kit (incl. Wi-Fi)
- 64501-0501; FLIR E40bx (incl. Wi-Fi)
- 64502-1101; FLIR E50
- 64501-0201; FLIR E50 (incl. Wi-Fi)
- 64501-0601; FLIR E50bx (incl. Wi-Fi)
- 64502-1202; FLIR E60
- 64501-0302; FLIR E60 (incl. Wi-Fi)
- 64501-0702; FLIR E60bx (incl. Wi-Fi)
- 64501-0402; FLIR E63 (incl. Wi-Fi)

Accessories for FLIR Exx (2017) series

General description	
High capacity battery for the IR camera.	
Power system	
Battery type	Rechargeable Li ion battery
Battery voltage	7.2 V
Battery capacity	4.4 Ah at +20°C (+68°F)
Battery note	Approximate lithium content: 3.0 g
Charging system	In camera (AC adapter or 12 V from a vehicle) or 2-bay charger
Charging time	2.5 h to 95% capacity, charging status indicated by LED's
Charging temperature	0°C to +45°C (+32°F to +113°F)
Environmental data	
Battery storage temperature range	-40°C to +70°C (-40°F to +158°F)
Physical data	
Battery weight	0.24 kg (0.52 lb.)
Size (L × W × H)	141 × 47 × 28 mm (5.5 × 1.8 × 1.1 in.)
Shipping information	
Packaging, type	Cardboard box
Packaging, weight	0.324 kg (0.7 lb.)
Packaging, size	183 × 136 × 63 mm (7.2 × 5.4 × 2.5 in.)
EAN-13	7332558011805
UPC-12	845188012892
Country of origin	Sweden

General description

The FLIR Atlas SDK for .NET is a software development kit that enables developers to create applications. Supported by help files and sample code, developers can add functionality or collaborate with other FLIR products to get the result they want in their application.

Key features:

- Supports communication and streaming using FireWire, Gigabit, RTSP, and USB interfaces.
- Gives the user full control of the camera.
- Supports recording of images using FireWire, Gigabit, RTSP, and USB interfaces.
- Converts 16-bit signal pixels into temperature data, for maximum user flexibility.
- Allows 16-bit temperature linear, histogram, and signal outputs.

General description

The FLIR Atlas SDK for MATLAB is a software development kit that enables developers to create applications. Supported by help files and sample code, developers can add functionality or collaborate with other FLIR products to get the result they want in their application.

Key features:

- Supports communication and streaming using FireWire, Gigabit, RTSP, and USB interfaces.
- Gives the user full control of the camera.
- Supports recording of images using FireWire, Gigabit, RTSP, and USB interfaces.
- Converts 16-bit signal pixels into temperature data, for maximum user flexibility.
- Allows 16-bit temperature linear, histogram, and signal outputs.

Release notes

Version	3.1
---------	-----

Shipping information

Packaging, type	Cardboard box
List of contents	Download card with printed license key
Packaging, weight	0.056 kg (0.123 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558011133
UPC-12	845188012021
Country of origin	Sweden

System requirements

Operating system	MATLAB 2015 (32- and 64-bit) and one of the following operating systems: <ul style="list-style-type: none"> • Windows 7 (32- and 64-bit) • Windows 8 (32- and 64-bit) • Windows 10 (32- and 64-bit)
------------------	--

Compatible with the following products:

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°
- 72502-0503; FLIR T1010 45°
- 72501-0101; FLIR T1020 12°
- 72501-0102; FLIR T1020 28°
- 72501-0104; FLIR T1020 28° and 12°
- 72501-0105; FLIR T1020 28° and 45°
- 72501-0106; FLIR T1020 28°, 12°, and 45°
- 72501-0103; FLIR T1020 45°
- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0301; FLIR T1040 12°
- 72501-0302; FLIR T1040 28°
- 72501-0303; FLIR T1040 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°
- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)
- 55903-1016; FLIR T600 25° (incl. Wi-Fi and Ext. cal.)

General description

FLIR Reporter Professional is a powerful software for creating compelling and professional, fully customized, easy-to-interpret maintenance reports.

Professional Report Wizard guides you step-by-step in combining all IR inspection data - infrared and visual images, temperature measurements, and text notes – into a professional, easy-to-interpret maintenance report.

Key features:

- Flexible report page design and layout for customized reports
- Use quick insert function to easily create custom report pages
- Fully integrated with standard Microsoft Word
- Generates reports in standard MS Office format and PDF-format
- Powerful temperature analysis
- Triple Fusion Picture-in-Picture (movable, sizable, scalable)
- Rapid report manager supporting automatic report generation by drag-and-drop
- Support for MSX (Multi-Spectral Dynamic Imaging) images
- Support for sketch images in both IR and visual with on/off toggling
- Support for same FOV ("Field of View Match")
- Grid settings
- Trending functionality
- Automatic link to Google™ Maps for images with GPS coordinates
- Automatic summary table for the report
- Fine tune images and make full temperature analysis directly in Microsoft Word
- Spell check
- Create your own formulas including measurement values from images
- Play radiometric sequences directly in the report
- Search functionality to quickly finding images for your report
- Panorama tool for combining several images to a larger image
- Support for GF series IR images
- Auto Update function
- Support for METERLiNK™ data
- *.docx compatibility

General description
FLIR ResearchIR Max + HSDR 4 contains all the features of FLIR ResearchIR Max 4, plus support for FLIR High Speed Data Recorder (HSDR) products.
Main features:
<ul style="list-style-type: none"> • Pre/post-recording. • Mathematical processing toolbox. • Image filtering toolbox. • Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy. • View, record and store images at high speed. • Post-processing of fast thermal events. • Generate time-temperature plots from live images or recorded sequences. • Advanced start/stop recording conditions. • Unlimited number of analysis functions (spot, line, area). • File organizer. • Zoom and pan allows a closer look. • Multiple dockable objects for plots and statistics. • Export images and results to bitmap, video, Excel, MATLAB or CSV formats • Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.
FLIR ResearchIR Max + HSDR 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description

FLIR ResearchIR Max + HSDR 4 contains all the features of FLIR ResearchIR Max 4, plus support for FLIR High Speed Data Recorder (HSDR) products.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max + HSDR 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description

FLIR ResearchIR Max 4 is aimed at R&D and science professionals who use thermal imaging cameras with a cooled or uncooled detectors. FLIR ResearchIR Max makes the most of a thermal imaging camera, and allows high-speed recording and advanced thermal pattern analysis. FLIR ResearchIR Max is the perfect tool for industrial R&D.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description

FLIR ResearchIR Max 4 is aimed at R&D and science professionals who use thermal imaging cameras with a cooled or uncooled detectors. FLIR ResearchIR Max makes the most of a thermal imaging camera, and allows high-speed recording and advanced thermal pattern analysis. FLIR ResearchIR Max is the perfect tool for industrial R&D.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

Shipping information

Packaging, type	Cardboard box
List of contents	FLIR ResearchIR Max 4 download card, incl. license key.
Packaging, weight	0.066 kg (0.15 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558010488
UPC-12	845188011130
Country of origin	Sweden

Compatible with the following products:

- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°
- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)
- 55903-1016; FLIR T600 25° (incl. Wi-Fi and Ext. cal.)
- 55903-1022; FLIR T600 25° (incl. Wi-Fi)
- 55903-1007; FLIR T600 25° and 15° w/case
- 55903-1008; FLIR T600 25° and 45° w/case

General description
FLIR ResearchIR Standard 4 is aimed at the R&D benchtop testing environment for users of uncooled cameras. FLIR ResearchIR Standard provides the core analysis tools needed for rapid testing and assessment of thermal issues.
Main features:
<ul style="list-style-type: none"> • View live imagery from the camera • Record snapshots or movies to disk. • Post-processing of fast thermal events. • Generate time-temperature plots from live images or recorded sequences. • Analysis by region (spot, line, area). • File organizer. • Zoom and pan allows a closer look. • Multiple dockable objects for plots and statistics. • Export images and results to bitmap, Excel, or CSV formats
FLIR ResearchIR Standard 4 in combination with a FLIR thermal imaging camera is the perfect solution for any benchtop testing application application.

General description

FLIR Tools is a software suite specifically designed to provide an easy way to update your camera and create inspection reports.

Key features:

- Report templates (horizontal IR + DC, vertical IR + DC, horizontal IR + IR).
- Manual IR/Visual Image Grouping
- Import images from your camera to your computer.
- Apply filters when searching for images.
- Search all text in images and text annotations.
- Store the five latest search criteria's.
- Lay out, move, and resize measurement tools on any infrared image.
- Create PDF imagesheets of any images of your choice.
- Add headers, footers, and logos to imagesheets.
- Create PDF reports for images of your choice.
- Add headers, footers, and logos to reports.
- Report editor (report page preview and snap to grid).
- Sort function (by date, groups sorted by path, and groups sorted by date).
- Browse and purchase infrared cameras, software, and accessories in the webshop.
- Software localized to 21 languages.
- Support for MSX (Multi-Spectral Dynamic Imaging) Images
- Support for Sketch Images on both IR and Visual with toggling ON/OFF feature.
- Support for Same FOV (Field of View Match)
- Display of Compass Information in Edit and in Report.
- Display of GPS Information in Edit and in Report.
- Camera update (applies to FLIR Ex, Kxx, Exx and T6xx series only).

General description

Compared to FLIR Tools, FLIR Tools+ has the following features:

- Radiometric Panorama incl. MSX
- Radiometric IR Video Recording
- Advanced Reporting

FLIR Tools/Tools+ is a software suite specifically designed to provide an easy way to update your camera and create inspection reports.

FLIR Tools+ main features:

- Manual IR/Visual Image Grouping
- Radiometric Panorama incl. MSX
- Radiometric IR Video Recording
- Advanced Reporting for Microsoft Office.
- Report templates (horizontal IR + DC, vertical IR + DC, horizontal IR + IR).
- Import images from your camera to your computer.
- Apply filters when searching for images.
- Search all text in images and text annotations.
- Store the five latest search criteria's.
- Lay out, move, and resize measurement tools on any infrared image.
- Create PDF imagesheets of any images of your choice.
- Add headers, footers, and logos to imagesheets.
- Create PDF reports for images of your choice.
- Add headers, footers, and logos to reports.
- Report editor (report page preview and snap to grid).
- Sort function (by date, groups sorted by path, and groups sorted by date).
- Browse and purchase infrared cameras, software, and accessories in the webshop.
- Software localized to 21 languages.
- Support for MSX (Multi-Spectral Dynamic Imaging) Images
- Support for Sketch Images on both IR and Visual with toggling ON/OFF feature.
- Support for Same FOV (Field of View Match)
- Display of Compass Information in Edit and in Report.
- Display of GPS Information in Edit and in Report.
- Camera update (applies to FLIR Ex, Kxx, Exx and T6xx series only).

General description
<p>FLIR VideoReport makes reports including videos easy. You can create and edit your video clips taken with the FLIR GF series cameras. Build your movie with a few simple drag-and-drops. Delete bad shots and include only the best scenes.</p> <p>FLIR VideoReport is a software package specifically designed to provide an easy way to edit non-radiometric *.mp4 and *.avi video clips, taken with FLIR GF series cameras.</p>
<p>Key features:</p> <ul style="list-style-type: none"> • Create a longer video clip from several shorter ones, using a storyboard. • Rearrange the order of shorter video clips on a storyboard before you create a longer video clip. • Trim a video clip and make the portions that you don't want to display invisible. • Save any frame from a video clip as an image. • Add a title screen with custom text. • Add explanatory text to any video clip. • Play video clips at several different speeds. • Read out measurement values, stored as metadata from, an *.mp4 video clip. • Add digital photos to a video clip. • Add IR images to a video clip. • Add GPS information from the camera to a video clip. • Review file properties and information about the camera type, lens, and serial number. • Split a video clip into two parts. • Add markers (circle or arrow) as overlay graphics to any video clip. • Auto Update function

General description

This extender is intended for both fixed and non-fixed lens versions of the GF309 camera. It extends the existing 14.5° lens to achieve a better viewing angle when measuring the temperatures of furnace tubes through viewports.

It also features a heat shield to deflect the heat from the furnace. To achieve a high measurement accuracy, the external optics transmission will need to be entered into the camera firmware.

Note:

- Only firmware versions later than 2.x.x support the use of this lens extender.
- This product only applies to the 14.5° lens.
- The 14.5° lens is not included.

Imaging and optical data

Field of view (FOV)	14.5° × 10.9°
Minimum focus distance	1.2 m (3.94 ft.)
Focal length	38 mm (1.50 in.)
F-number	1.5
Lens note	For spectral range 3.8–4.05 μm

Physical data

Weight	0.51 kg (1.12 lb.) incl. lens caps, excl. camera-side bayonet mount
Size (L × D)	164.3 × 84 mm (6.5 × 3.3 in.), excl. lens caps

Shipping information

General description	
<p>This extender is intended for both fixed and non-fixed lens versions of the GF309 camera. It extends the existing 24° lens to achieve a better viewing angle when measuring the temperatures of furnace tubes through viewports.</p> <p>It also features a heat shield to deflect the heat from the furnace. To achieve a high measurement accuracy, the external optics transmission will need to be entered into the camera firmware.</p>	
Note:	
<ul style="list-style-type: none"> • Only firmware versions later than 2.x.x support the use of this lens extender. • This product only applies to the 24° lens. • The 24° lens is not included. 	

Imaging and optical data	
Field of view (FOV)	24° × 18°
Minimum focus distance	0.6 m (1.97 ft.)
Focal length	23 mm (0.91 in.)
F-number	1.5
Lens note	For spectral range 3.8–4.05 μm

Physical data	
Weight	0.64 kg (1.41 lb.) incl. lens caps, excl. camera-side bayonet mount
Size (L × D)	132 × 84 mm (5.2 × 3.3 in.), excl. lens caps

General description	
High capacity battery for the IR camera.	
Power system	
Battery type	Rechargeable Li ion battery
Battery voltage	7.2 V
Battery capacity	4.4 Ah at +20°C (+68°F)
Battery note	Approximate lithium content: 3.0 g
Charging system	In camera (AC adapter or 12 V from a vehicle) or 2-bay charger
Charging time	2.5 h to 95% capacity, charging status indicated by LED's
Charging temperature	0°C to +45°C (+32°F to +113°F)
Environmental data	
Battery storage temperature range	-40°C to +70°C (-40°F to +158°F)
Physical data	
Battery weight	0.24 kg (0.52 lb.)
Size (L × W × H)	141 × 47 × 28 mm (5.5 × 1.8 × 1.1 in.)
Shipping information	
Packaging, type	Cardboard box
Packaging, weight	0.324 kg (0.7 lb.)
Packaging, size	183 × 136 × 63 mm (7.2 × 5.4 × 2.5 in.)
EAN-13	7332558004364
UPC-12	845188004347
Country of origin	Sweden

Compatible with the following products:

- 44401-0201; FLIR GF300 14.5°
- 44402-0201; FLIR GF300 14.5° Fixed lens
- 44401-0202; FLIR GF300 24°
- 44402-0202; FLIR GF300 24° Fixed lens
- 59601-0101; FLIR GF304 14.5°

General description

The Extended Warranty Package covers parts and labour for your IR camera, consumables not included.

FLIR Systems warrants its products to be free from defects caused by faulty material or poor workmanship, for a period specified above. **NO PRODUCT IS WARRANTED TO BE MERCHANTABILITY OR FIT FOR ANY PARTICULAR USE OR APPLICATION.** The warranty is void if the buyer damages the item due to misuse, abuse, modification, processing, or integration with other items. FLIR Systems' maximum liability under this warranty is limited to the obligation to replace or, at its sole option, to credit Buyer's account up to the purchase price.

General description	
FLIR P/B/SC6xx and FLIR GF3xx series: Power supply, including multiple plugs, to charge the battery when it is inside or outside of the camera.	
FLIR T6xx and FLIR Exx series: Power supply, including multiple plugs, to charge the battery when it is inside the camera or in the battery charger.	
Power system	
AC operation	100–240 VAC, 50/60 Hz, 12 VDC out
Power	3000 mA at 12 VDC
Physical data	
Cable length	1.98 m (6.5 ft.)
Shipping information	
Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Power supply including cable • EU plug • UK plug • US plug • AU plug
Packaging, weight	0.324 kg (9.7 lb.)
Packaging, size	152 × 78 × 73 mm (6.0 × 3.1 × 2.9 in.)
EAN-13	7332558003794 4743254001763 (Estonia plant)
UPC-12	845188002145
Country of origin	Sweden

Compatible with the following products:

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°
- 72502-0503; FLIR T1010 45°

General description	
<p>The ThermoVision LabVIEW Toolkit is a set of VIs (virtual instruments) for cameras that support alarms, measurement functions, and I/O functionality.</p> <p>Through LabVIEW, you can use these VIs as sub-VIs to manage communications with a FLIR IR camera in digital mode.</p> <p>You can also generate true temperature images from images acquired through LabVIEW, and can use the LabVIEW IR Measurement and Display tools to analyze the temperatures of imaged objects.</p>	
<p>Key features:</p> <ul style="list-style-type: none"> • Set up communications between LabVIEW VI and a FLIR IR camera • Capture and collect images via FireWire or Ethernet interfaces • Adjust the camera configuration parameters and focus as you view a live image • Control the camera calibration • Send any other camera command to the camera • Generate a true temperature image from a 16-bit image acquired using the camera's FireWire or Ethernet interfaces • Close communications to the IR camera 	
<p>Users with licenses for the previous version can download a free upgrade via the following link: http://support.flir.com/SwDownload/app/RssSWDownload.aspx?ID=63</p>	
<p>Note: Only supports National Instrument 32-bit Labview</p>	

Release notes	
Version	3.3
New features	<ul style="list-style-type: none"> • Windows 7 32- and 64-bit support • Support for FLIR A615 and FLIR SC6X5 (including windowing) • Support for windowing in FLIR SC660 • Various bug fixes • New example VIs

Shipping information

General description	
ThermoVision™ System Developers Kit	
Key features:	
<ul style="list-style-type: none"> • Supports communication and broadcasting via FireWire™, Ethernet, and USB interfaces. • Gives the user full control of the camera. • Allows the user to set alarm conditions and measurement functions in the camera • Allows the user to define I/O functionality (FLIR A series). • Based on ActiveX technology. • Supports acquisition of images through FireWire™, Ethernet, and USB interfaces. • Reads from and writes to file in FLIR Systems' proprietary file format and writes to files in FLIR Systems' open floating point format (*.fpf). • Converts 16-bit absolute pixels into temperature pixels and several intermediate types of pixels formats, for maximum user flexibility. Applies to all camera models with temperature measurement capabilities. • Allows 16-bit temperature linear outputs from FLIR A series cameras. • Includes method that allows using individual emissivity value correction on any single pixel or condensed measuring value – e.g. average, minimum etc. • Supports conditional recording to file through FireWire™, Ethernet, and USB interfaces. 	
Users with licenses for the previous version can download a free upgrade via the following link: http://support.flir.com/SwDownload/app/RssSWDownload.aspx?ID=62

General description	
High capacity battery for the FLIR GFx3xx and FLIR GF3xx series.	
Power system	
Battery type	Rechargeable Li ion battery
Battery voltage	7.2 V
Battery capacity	4.4 Ah at +20°C (+68°F)
Battery note	Approximate lithium content: 3.0 g
Battery charging	2-bay charger or AC adapter 90–260 VAC, 50/60 Hz or 12 V from a vehicle (cable with standard plug, optional)
Charging time	2.5 h to 95% capacity, charging status indicated by LED's
Charging temperature	0°C to +45°C (+32°F to +113°F)
Environmental data	
Battery storage temperature range	–40°C to +70°C (–40°F to +158°F)
Physical data	
Battery weight	0.22 kg (0.48 lb.)
Size (L × W × H)	140 × 40 × 27 mm (5.5 × 1.6 × 1.1 in.)
Shipping information	
Packaging, type	Cardboard box

General description	
Part number	MR-PINS2
Part name	2 inch pins for MR06, MR07, MR08, includes 1 pair of pins
<p>FLIR's new insulated pins are smaller in diameter—requiring minimal force to drive the pins into a surface—resulting in less impact to the material. The sandblasted, hardened-steel pins with a single-piece design prevent bending and create an improved bonding surface for the abrasion-resistant insulation. The insulation extends all the way to the connection to the probe, so even if you drive the pins all the way into the wall cavity, the drywall will not affect the measurement.</p> <ul style="list-style-type: none">• Fits FLIR's hammer, wall cavity and combo probes.• Unibody construction rather than two piece.• Smaller-diameter pins.• Sandblasted hardened steel.• Insulated with abrasion-resistant coating. <p>Replacement pin set for FLIR MR06, MR07, and MR08.</p>	

Meter data	
Suitable accessory	MR06, MR07, MR08
Included insulated pin pairs and length	1 pair of 2 in. (50 mm)
Warranty	1 year (with registration)

Meter physical data	
Weight	0.02 kg (0.05 lb.)
Dimensions (H x W x L)	8 mm x 8 mm x 76 mm (0.32 in. x 0.32 in. x 3 in.)
Material	Stainless steel
Color	Black insulation

Shipping information	
Packaging type	Plastic bag
Packaging contents	1 pair of 2 in. insulated pins
Packaging weight	0.0127 kg (0.03 lb.)
Packaging dimensions (H x W x L)	1 cm x 2 cm x 8 cm (0.4 in. x 0.8 in. x 3.2 in.)
Inner carton weight	1.5 kg (3.3 lb.)
Inner carton dimensions (H x W x L)	13 cm x 19 cm x 38 cm (5.2 in. x 7.5 in. x 15 in.)
Inner carton quantity (bag)	100
Master carton weight	6 kg (13.3 lb.)
Master carton dimensions (H x W x L)	28 cm x 40 cm x 40 cm (11 in. x 15.8 in. x 15.8 in.)

Customer support

<http://support.flir.com>

General description	
Part number	MR-PINS4
Part name	4 inch pins for MR06, MR07, MR08, includes 1 pair of pins
<p>FLIR's new insulated pins are smaller in diameter—requiring minimal force to drive the pins into a surface—resulting in less impact to the material. The sandblasted, hardened-steel pins with a single-piece design prevent bending and create an improved bonding surface for the abrasion-resistant insulation. The insulation extends all the way to the connection to the probe, so even if you drive the pins all the way into the wall cavity, the drywall will not affect the measurement.</p> <ul style="list-style-type: none"> • Fits FLIR's hammer, wall cavity and combo probes. • Unibody construction rather than two piece. • Smaller-diameter pins. • Sandblasted hardened steel. • Insulated with abrasion-resistant coating. <p>Replacement pin set for FLIR MR06, MR07, and MR08.</p>	

Meter data	
Suitable accessory	MR06, MR07, MR08
Included insulated pin pairs and length	1 pair of 4 in. (101 mm)
Warranty	1 year (with registration)

Meter physical data	
Weight	0.02 kg (0.05 lb.)
Dimensions (H x W x L)	8 mm x 8 mm x 127 mm (0.32 in. x 0.32 in. x 5 in.)
Material	Stainless steel
Color	Black insulation

Shipping information	
Packaging type	Plastic bag
Packaging contents	1 pair of 4 in. insulated pins
Packaging weight	0.172 kg (0.4 lb.)
Packaging dimensions (H x W x L)	1 cm x 2.5 cm x 13 cm (0.4 in. x 1 in. x 5.2 in.)
Inner carton weight	2 kg (4.4 lb.)
Inner carton dimensions (H x W x L)	13 cm x 19 cm x 38 cm (5.2 in. x 7.5 in. x 15 in.)
Inner carton quantity (bag)	100
Master carton weight	8 kg (17.7 lb.)
Master carton dimensions (H x W x L)	28 cm x 40 cm x 40 cm (11 in. x 15.8 in. x 15.8 in.)
Master carton quantity	400

<http://support.flir.com>

General description	
Part number	MR-PINS6
Part name	6 inch pins for MR06, MR07, MR08, includes 1 pair of pins
<p>FLIR's new insulated pins are smaller in diameter—requiring minimal force to drive the pins into a surface—resulting in less impact to the material. The sandblasted, hardened-steel pins with a single-piece design prevent bending and create an improved bonding surface for the abrasion-resistant insulation. The insulation extends all the way to the connection to the probe, so even if you drive the pins all the way into the wall cavity, the drywall will not affect the measurement.</p> <ul style="list-style-type: none"> • Fits FLIR's hammer, wall cavity and combo probes. • Unibody construction rather than two piece. • Smaller-diameter pins. • Sandblasted hardened steel. • Insulated with abrasion-resistant coating. <p>Replacement pin set for FLIR MR06, MR07, and MR08.</p>	

Meter data	
Suitable accessory	MR06, MR07, MR08
Included insulated pin pairs and length	1 pair of 6 in. (152 mm)
Warranty	1 year (with registration)

Meter physical data	
Weight	0.02 kg (0.05 lb.)
Dimensions (H x W x L)	8 mm x 8 mm x 178 mm (0.32 in. x 0.32 in. x 7 in.)
Material	Stainless steel
Color	Black insulation

Shipping information	
Packaging type	Plastic bag
Packaging contents	1 pair of 6 in. insulated pins
Packaging weight	0.022 kg (0.05 lb.)
Packaging dimensions (H x W x L)	1 cm x 3 cm x 19 cm (0.4 in. x 1.2 in. x 7.5 in.)
Inner carton weight	2.5 kg (5.6 lb.)
Inner carton dimensions (H x W x L)	13 cm x 19 cm x 38 cm (5.2 in. x 7.5 in. x 15 in.)
Inner carton quantity (bag)	100
Master carton weight	10 kg (22 lb.)
Master carton dimensions (H x W x L)	28 cm x 40 cm x 40 cm (11 in. x 15.8 in. x 15.8 in.)
Master carton quantity	400

Part No.	VSC80-2R
----------	----------

General information	
Short description	8 mm (0.31") camera with 2 m (6.6') semi-rigid probe—VGA via long focus
Compatible main unit	VS70
Integrated handset	No
Wireless capabilities	N/A
Compatible wireless handset	With optional VST
Compatible detachable cameras	N/A
Warranty	2 years

Camera specifications	
Articulation	No
Diameter	8.0 mm
Resolution	VGA (640 × 480 pixels)
Probe length	2 m (6.6')
Focal length	65 mm to infinity
Field of view	56°
Imaging sensor	CMOS
Video format	NTSC
Brightness control	Manual with variable options
Lamp type	LED

Power system	
Power requirements	N/A

Environmental data	
Operating temperature	-10 to 50°C (14–122°F)
Operating humidity	80% maximum
Storage temperature	-40 to 80°C (-40 to 176°F)

Physical data	
Weight	See shipping information
Dimensions (H × W × L)	See shipping information
Material	PC-ABS, rubber hand grip, nylon strap

Part number	TA55
Part description	AC Current Line Splitter
	<ul style="list-style-type: none"> • Provides easy and safe measurements of current and voltage from two or three wire outlets. • Plugging the power connector into the line splitter separates the hot/live conductor from the neutral (and ground) for accurate current measurement. • Dual ranges (x1 and x10) for higher resolution on low-amperage readings. • Built-in recessed voltage testing inputs. • 2 year warranty.

Specifications	
Voltage	120 V \pm 10%
Current	15 A AC maximum
Temperature	Operating: 5–40°C (41–104°F); storage: –20 to 60°C (–4 to 140°F)
Humidity	Operating: max. 80% up to 31°C (87°F) decreasing linearly to 50% at 40°C (104°F); storage <80%
Altitude	2000 m (7000') max.

Meter data	
Suitable main unit	CM78, CM83 (CM82, CM85)
Warranty	2 years

Certifications	
Certifications	UL, CUL, CAT II—600 V
Safety	For indoor use and in accordance with the requirements for double insulation to IEC 1010-1 (1995): EN 61010-1 (1995), Overvoltage Category II, Pollution Degree 2

Meter physical data	
Weight:	0.102 kg
Dimensions (H x W x L)	2.2 cm x 6.03 cm x 16.2 cm
Material	PC-ABS
Color	Black

Shipping information	
Packaging type	Color box with view of product in clamshell

General description	
Part number	MR08
Part name	Hammer and Wall Cavity Probe Combo
<p>The FLIR MR08 Hammer and Wall Cavity Probe Combo is ideal for both hammer probe and wall cavity applications. The hammer probe has an additional handle on the bottom to add convenience for angled, horizontal, and inverted hammer-probing needs. The bottom handle can be unscrewed and used as a wall cavity probe to measure the moisture level of insulation within the wall cavity and can also reach the inside face of an exterior wall. You can also install the impact plate for use with a hammer to punch the extended pins through drywall.</p> <p>FLIR's new insulated pins are smaller in diameter—requiring minimal force to drive the pins into a surface—resulting in less impact to the material. The sandblasted, hardened-steel pins with a single-piece design prevent bending and create an improved bonding surface for the abrasion-resistant insulation. The insulation extends all the way to the connection to the probe, so even if you drive the pins all the way into the wall cavity, the drywall will not affect the measurement.</p> <ul style="list-style-type: none"> • Insulated pins designed for increased durability. • Rubberized ergonomic grips reduce slippage. • Detachable cord with a durable BNC connection. • Pins included: 2 pairs of 2 in. pins, 1 pair of 4 in. pins, 1 pair of 6 in. pins. • Impact plate to drive pins through a drywall. 	

Meter data	
Suitable main unit	MR77, MR160, MR176
Cable length	2.45 m (8 ft.) uncoiled
Included insulated pin pairs and length	2 pairs of 2 in. (50 mm), 1 pair of 4 in. (101 mm), 1 pair of 6 in. (152 mm)
Warranty	2 years (with registration)

Meter physical data	
Weight	1.48 kg (3.25 lb.)
Dimensions (H x W x L)	4.5 cm x 5.97 cm x 56.9 cm (1.8 in. x 2.4 in. x 22.4 in.)
Material	PC-ABS, stainless steel
Color	Black

Shipping information	
Packaging type	White box with accessory color printing
Packaging contents	MR08, 2 pairs of 2 in. insulated pins, 1 pair of 4 in. insulated pins, 1 pair of 6 in. insulated pins, cable, impact plate, pin wrench, shoulder case
Packaging weight	5 kg (11.1 lb.)
Packaging dimensions (H x W x L)	15.5 cm x 18 cm x 65 cm (6.1 in. x 7.1 in. x 25.6 in.)
Master carton weight	11 kg (24.25 lb.)
Master carton dimensions (H x W x L)	18.5 cm x 36.5 cm x 67 cm (7.3 in. x 14.4 in. x 26.4 in.)

General description	
Part number	MR07
Part name	Hammer Probe
<p>The FLIR MR07 Hammer Probe expands the functionality of your FLIR moisture meter by allowing you to take measurements in the subfloor through carpet, hardwood flooring, and hard materials that are difficult to penetrate with a standard pin probe.</p> <p>FLIR's new insulated pins are smaller in diameter—requiring minimal force to drive the pins into a surface—resulting in less impact to the material. The sandblasted, hardened-steel pins with a single-piece design prevent bending and create an improved bonding surface for the abrasion-resistant insulation. The insulation extends all the way to the connection to the probe, so even if you drive the pins all the way into the wall cavity, the drywall will not affect the measurement.</p> <ul style="list-style-type: none"> • Insulated pins designed for increased durability. • Rubberized ergonomic grips reduce slippage. • Detachable cord with durable BNC connection. • Pins included: 2 pairs of 2 in. pins.

Part number	MR05
Part description	Impact Pin Moisture Probe
<p>The FLIR MR05 upgrades your FLIR moisture meter to help you easily test for moisture in challenging spots—on rough or uneven surfaces, in corners, in hard woods or high-density materials, and even, with ease, in areas without a dry reference. Made with extra-durable pins and a metallic impact plate that can withstand hammering to drive pins into the hardest materials, the FLIR MR05 lets you tackle the toughest moisture-measurement challenges all day long. Key features include six additional sets of thick and thin pins, an external pin accessory for the FLIR moisture meter mount for extended reach, a 1/4"-20 integrated wrench on the cap to replace pins, a durable BNC connector, a 2 m coiled cord, and a 2 year warranty.</p>

General description	
Part number	TA04-KIT
Part name	Lithium Polymer Rechargeable Battery Kit
Kit description	Rechargeable battery kit for the FLIR DM284 Imaging Multimeter with extended battery life
Kit contents	The TA04-KIT includes a FLIR DM284 replacement battery door, an Li polymer rechargeable battery, an AC charging adapter with international AC inlet clips for wall outlets, and a quick start guide. The following AC inlet clips are included: North America, Europe, UK, Australia, and Korea.

Battery	
Type	Li polymer rechargeable
Output	3.7 V, 3050 mA h, 11.3 W h
Battery life	Approximately 30 hours constant use in DMM mode or 11 hours constant use in IGM mode
Charge indicator LED	Red/green

Charging adapter	
Input	100–240 V AC, 50/60 Hz, 0.4 A maximum
Output	5 V, 2000 mA

General	
Warranty	2 years limited

Certifications	
Safety standards compliance	CE EMC: EN 61326-1, EN 61000-3-2, EN 61000-3-3 CE LVD (also CB): IEC 62133:2012 US/CAN Safety: UL 1642 (cell), UL 2054 (pack)—UL File Listing MH61622 FCC: FCC Part 15B IC (Canada): ICES-003

Part number	MR09
Part name	Baseboard probe
When connected to a FLIR Moisture Meter (using the supplied cable), the MR09 allows the user to take relative moisture measurements behind trim pieces, baseboards, crown molding, and masonry; under tile, inside walls/ceilings, and other such places where the sensor blades can be inserted. The blades are designed to 'flex' into the measurement cavity eliminating the need to remove the obstacle that would otherwise prevent a standard pin or pinless measurement. This probe is designed to operate with FLIR Moisture Meters.	

General information	
Warranty	2 years
Measurement type	Resistive moisture measurements for reference only
Penetration depth	15 cm (6 in.) maximum

Meter physical data	
Blade Material	400-series stainless steel; thickness: 1 mm (0.04 in.)
Mounting hole for conversion plate	9.5 mm (3/8 in.) threaded
Cable length	2.45 cm (8 ft.)
Weight	494 g (1.2 lbs.)
Dimensions (H x W x L)	34 x 10 x 6 cm (13.4 x 4.0 x 2.4 in.)
Color	Black handle. Metallic color blades

Shipping information	
Packaging, type	Retail box
Packaging, Contents	MR09 Baseboard Probe, RJ45-to-BNC connecting cable, and Instruction sheet
Each Weight	0.9 Kg
Each Dimensions (H x W x L)	11.5 x 37.6 x 11.5 cm
Master Carton Weight	8.5 Kg
Master Carton Dimensions (H x W x L)	51 x 25 x 40 cm
Master Carton Quantity	8
EAN-13	0793950370094
UPC-12	793950370094
Country of Origin	China

Part number	TA03-KIT
Part name	NiMH Rechargeable Battery Kit
Kit description	Rechargeable battery kit for the CM174 Imaging 600A AC/DC Clamp Meter with extended battery life
Kit contents	The TA03-KIT includes 8 NiMH rechargeable batteries (2 sets), Charger and AC adapter with international AC inlet clips for wall outlets and a quick-start guide. The following AC inlet clips are included: N.America, Europe, UK, Australia, Korea.

Battery	
Type	NiMH rechargeable, AAA
Output	1.2V, 900mAh, 1.1 Wh
Battery life	Approximately 11 hours constant use in CM mode or 4 hours constant use in IGM mode

Charger and AC Adapter	
AC Adapter Input	100-240VAC, 50/60Hz, 0.4A max
AC Adapter Output	9-12VDC
Charger Input	12V DC, 0.5A
Charger Output	1.2V x 4, 250 mA DC
Charge indicator	Charging, Fully Charged, Bad/ Incorrect Battery

General	
Warranty	Two years limited

Certifications	
Safety standards compliance	CE EMC: EN 61326:2013, EN 61000-3-2:2014, EN 61000-3-3:2013 CE LVD: IEC 61010:2010 (Ed. 3) US Safety: UL 61010-1:2012 (3rd Edition), CAN Safety: CAN/CSA-C22.2 No. 61010-1:2012 (3rd Edition) FCC: FCC Part 15 Subpart B:2016

General description	
Part number	TA84
Part name	Test Lead Storage Accessory
Kit description	Securely store your test probes on the back of your FLIR ultrameter when not in use. The FLIR TA84 firmly attaches to the multimeter's tripod mount.

General	
Warranty	2 years

Physical data	
Screw size	¼"-20 UNC
Weight	33.80 g (1.19 oz.)
Dimensions (L × W × D)	54.00 mm × 76.85 mm × 15.20 mm (2.13 in. × 3.02 in. × 0.59 in.)
Color	Black

Shipping information	
Packaging type	Color, retail box
Packaging contents	TA84 test lead storage unit with mounting screw
Weight	0.1 kg (0.2 lb.)
Dimensions (H × W × L)	2.5 cm × 7.7 cm × 16.8 cm (1.0 in. × 3.0 in. × 6.6 in.)
Master carton weight	3.8 kg (8.4 lb.)
Master carton dimensions (H × W × L)	36.5 cm × 33.5 cm × 20.5 cm (14.4 in. × 13.2 in. × 8.0 in.)
Master carton quantity	20
EAN-13	0793950377840

Part number	TA60
Part description	Thermocouple Probe with Adapter
<ul style="list-style-type: none"> Type K thermocouple temperature sensor. Can be used to measure temperature with many meters. Fast responding with a wide general-purpose measurement range. Safety-shrouded banana to banana connection. 2 year warranty 	
Specifications	
Temperature range	-40 to 1200°C (-40 to 2192°F)
Meter data	
Suitable main unit	DM93, CM78 (DM92)
Warranty	2 years
Certifications	
Certifications	ITS-90 (JIS C-1602-1995 Class 2)
Meter physical data	
Weight	0.06 kg
Dimensions (H x W x L)	15.24 cm x 3.81 cm x 1.27 cm
Material	ABS plus PC, bronze (nickel plated), PVC
Color	Black and yellow
Shipping information	
Packaging type	Color box
Packaging contents	Manual, TA60
Packaging weight:	0.08 kg
Packaging dimensions (H x W x L)	7.62 cm x 2.54 cm x 16.83 cm
Carton weight	4 kg
Carton dimensions	14.5" x 13" x 8"
Carton quantity	48

General description	
Part number	MR06
Part name	Wall Cavity Probe
<p>The FLIR MR06 Wall Cavity Probe expands the functionality of your FLIR moisture meter by allowing you to easily measure insulation moisture levels within a wall cavity and the inside face of exterior walls.</p> <p>FLIR's new insulated pins are smaller in diameter—requiring minimal force to drive the pins into a surface—resulting in less impact to the material. The sandblasted, hardened-steel pins with a single-piece design prevent bending and create an improved bonding surface for the abrasion-resistant insulation. The insulation extends all the way to the connection to the probe, so even if you drive the pins all the way into the wall cavity, the drywall will not affect the measurement.</p> <ul style="list-style-type: none"> • Insulated pins designed for increased durability. • Rubberized ergonomic grips reduce slippage. • Detachable cord with a durable BNC connection. • Pins included: 1 pair of 4 in. pins, 1 pair of 6 in. pins. • Impact plate to drive pins through a drywall. 	

Meter data	
Suitable main unit	MR77, MR160, MR176
Cable length	2.45 m (8 ft.) uncoiled
Included insulated pin pairs and length	1 pair of 4 in. (101 mm), 1 pair of 6 in. (152 mm)
Warranty	2 years (with registration)

Meter physical data	
Weight:	0.50 kg (1.10 lb.)
Dimensions (H x W x L)	4.5 cm x 5.97 cm x 28.49 cm (1.8 in. x 2.4 in. x 11.2 in.)
Material	PC-ABS
Color	Black

Shipping information	
Packaging type	Color retail packaging
Packaging contents	MR06, 1 pair 4 in. insulated pins, 1 pair 6 in. insulated pins, cable, impact plate, pin wrench
Packaging weight	0.6 kg (1.3 lb.)
Packaging dimensions (H x W x L)	5.3 cm x 12.3 cm x 19.5 cm (2 in. x 4.9 in. x 7.7 in.)
Master carton weight	11 kg (24.24 lb.)
Master carton dimensions (H x W x L)	24 cm x 28 cm x 44.5 cm (9.5 in. x 11 in. x 17.5 in.)
Master carton quantity	16
EAN-13	0793950370063
UPC-12	793950370063

Introduction	Wireless handset for the VS70 system
--------------	--------------------------------------

VST general	
ERP description	Wireless 2.4 GHz handset transmitter for the VS70 system
Compatible main unit	VS70
Compatible wireless handset	N/A
Compatible cameras and spools	VSC3.9-1FM, VSC4.1-2RM, VSC5.8-1RM, VSC5.8-2RM, VSC5.8-1R, VSC5.8-2R, VSC5.8-20M, VSC5.8-30M, VSC8.0-1R, VSC8.0-2R, VSC6.5-12S, VSC6.5-17S, VSS-20, VSS-30
Wireless frequency	2.4 GHz to main unit
Unobstructed effective range	10 m (32.5')
Video system	NTSC/PAL
Battery	3.7 V rechargeable lithium polymer
Power adapter	100–240 V input/9 V DC output
Operating temperature	–10 to 60°C (14–140°F)
Storage temperature	–40 to 80°C (–40 to 176°F)
Product dimensions	190 mm × 70 mm × 63.5 mm (7.5" × 2.75" × 2.5")
Weight (approximate)	0.43 kg (0.95 lb.)
Color	Gray, black
Warranty	2 years

Shipping information	
Packaging type	White box with FLIR accessory printing
Packaging contents	White box with FLIR accessory printing, VST
Packaging weight	0.55 kg
Packaging dimensions (H × W × L)	23.5 cm × 7.5 cm × 7 cm
Carton weight	12 kg
Carton dimensions (H × W × L)	39.5 cm × 37 cm × 25.5 cm
Carton quantity	20
EAN-13	0793950406168

Part number	VSA4-1M-W
The new FLIR wireless four-way articulation videoscope cameras for the VS70 allows for inspection of tight, remote, and off-center targets. Use both articulation knobs to control movement of the camera up, down, left, and right to get a complete video or picture for your inspection. These cameras come with an integrated handset that contains power and brightness adjustment buttons. Set your display down or let it hang from the neck strap while you focus on your probe orientation without worrying about cords. Also included are the handy camera tip accessories that allow viewing at a 45° angle (mirror), retrieving a metallic object (magnet), and reduce the likelihood of getting stuck (anti-snag ball).	

General information	
Compatible main unit	VS70
Integrated handset	Yes
Wireless capabilities	2.4 GHz to main unit
Wireless maximum range	30 m
Compatible wireless handset	N/A
Compatible detachable cameras	N/A
Warranty	2 years

Camera specifications	
Articulation	240 ± 20° manual tip articulation
Diameter	8 mm
Resolution	VGA (640 × 480 pixels)
Probe length	1 m
Focal length	25–60 mm
Field of view	60°
Imaging sensor	CMOS
Video format	NTSC
Brightness control	Manual with 10 level options
Lamp type	LED
Adjustable articulation tension	Yes, via manual knob

Power system	
Power requirements	Integrated rechargeable battery

Part No.	VSA2-2M-W
----------	-----------

General information	
Short description	Wireless two-way 6 mm (0.24") articulating camera with 2 m (78") probe with short macro focus
Compatible main unit	VS70
Integrated handset	Yes
Wireless capabilities	2.4 GHz to main unit
Compatible wireless handset	N/A
Compatible detachable cameras	N/A
Warranty	2 years

Camera specifications	
Articulation	Two-way 240 ± 20° manual tip articulation
Diameter	6 mm
Resolution	VGA (640 × 480 pixels)
Probe length	2 m
Focal length	20–60 mm
Field of view	56°
Imaging sensor	CMOS
Video format	NTSC
Brightness control	Manual with variable options
Lamp type	LED

Power system	
Power requirements	Integrated rechargeable battery
Run time	2 hours continuous use
Auto power off	No
Power adapter	100–240 V input/5 V DC output

Wireless two-way 6 mm (0.24") articulating camera with 2 m (78") probe with short macro focus

General description	
High capacity battery for the IR camera.	
Power system	
Battery type	Rechargeable Li ion battery
Battery voltage	3.65 V
Battery capacity	8.5 Ah
Charging system	In camera (AC adapter or 12 V from a vehicle) or 2-bay charger
Charging time	2.5 h to 90% capacity, charging status indicated by LED's
Charging temperature	0°C to +45°C (+32°F to +113°F)
Environmental data	
Battery storage temperature range	-40°C to +70°C (-40°F to +158°F)
Physical data	
Battery weight	0.182 kg (0.40 lb.)
Size (L x W x H)	84 x 49 x 60 mm (3.3 x 1.9 x 2.4 in.)
Shipping information	
Packaging, type	Cardboard box
Packaging, weight	0.281 kg (0.62 lb.)
Packaging, size	183 x 136 x 63 mm (7.2 x 5.4 x 2.5 in.)
EAN-13	7332558011799
UPC-12	845188012885
Country of origin	Sweden

Compatible with the following products:

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°
- 72502-0503; FLIR T1010 45°
- 72501-0101; FLIR T1020 12°
- 72501-0102; FLIR T1020 28°
- 72501-0104; FLIR T1020 28° and 12°
- 72501-0105; FLIR T1020 28° and 45°
- 72501-0106; FLIR T1020 28°, 12°, and 45°
- 72501-0103; FLIR T1020 45°
- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0301; FLIR T1040 12°
- 72501-0302; FLIR T1040 28°
- 72501-0303; FLIR T1040 45°
- 72501-0401; FLIR T1050sc 12°

Battery Li-ion 3.65 V, 8.5 Ah, 32 Wh

General Maintenance package offers a complete 14 points inspection and calibration service (for one lens combination). Shipping cost not included.

14-point inspection program:

- Perform a complete operational check.
- Fusion calibration and laser alignment, when applicable.
- Verify all internal cable and PCB connections.
- Clean the viewfinder and check the optics.
- Upgrade the internal camera software to the latest revisions.
- Perform minor repairs.
- Verify and/or re-equalize as needed each temperature range for image uniformity.
- Verify standard lens calibration (optional: other or specially engineered lenses).
- Verify ambient temperature compensation as needed.
- Recalibration to ensure factory specifications are met.
- Calibrate temperature ranges up to +1500°C, when applicable.
- Perform a quality-approved acceptance test procedure.
- Provide a calibration label with the next due date.
- Provide a calibration certificate (optional: extended calibration certificate with measured values).

General description
This cable is used to power the infrared camera from the cigarette lighter socket in a car.
Note: This is the same product as p/n 1196497.

Physical data	
Cable length	1.2 m (3.9 ft.)

Shipping information	
Packaging, type	Cardboard box
Packaging, weight	0.125 kg (0.28 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558004340 4743254001435 (Estonia plant)
UPC-12	845188004361
Country of origin	Sweden

Compatible with the following products:

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°

General description

For R&D usage or development purposes. As an example looking at PCB's or small electronic components.

Imaging and optical data

Field of view (FOV)	16 × 12 mm (20 mm diagonally)
Magnifying factor	1.5×
Working distance	46 mm
Depth of field	0.21 mm
Focal length	62 mm
Spatial resolution (IFOV)	25 μm
Lens identification	Automatic
F-number	1.1
Number of lenses	4 (4 asph)
MTF @ 70% of FOV	Normal requirements (52%)
Distortion	< 3%

Physical data

Weight	0.48 kg (1.1 lb.)
Size (L × D)	86 × 67 mm
Front lens diameter	52 mm

Shipping information

Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Lens • Front lens cap • Rear lens cap • Case • Instruction for mounting close-up lenses
Packaging, weight	0.737 kg (1.6 lb.)
Packaging, size	172 × 131 × 133 mm (6.8 × 5.2 × 5.2 in.)

General description

For R&D usage or development purposes. As an example looking at PCB's or small electronic components.

Imaging and optical data

Field of view (FOV)	32 × 24 mm (40 mm diagonally)
Magnifying factor	2.9×
Working distance	84 mm
Depth of field	0.65 mm
Focal length	78 mm
Spatial resolution (IFOV)	50 μm
Lens identification	Manual
F-number	1.0
Number of lenses	2 (2 asph)
MTF @ 70% of FOV	Normal requirements (52%)
Distortion	3%
Lens note	The close-up lens is mounted on the 25° lens

Physical data

Weight	0.197 kg (0.43 lb.)
Size (L × D)	32 × 67 mm
Front lens diameter	53 mm

Shipping information

Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Lens • Front lens cap • Rear lens cap • Case • Instruction for mounting close-up lenses
Packaging, weight	0.440 kg (0.97 lb.)
Packaging, size	172 × 131 × 133 mm (6.8 × 5.2 × 5.2 in.)
EAN-13	7332558005583
UPC-12	845188005795
Country of origin	Sweden

Compatible with the following products:

- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)

General description

The FLIR Atlas SDK for .NET is a software development kit that enables developers to create applications. Supported by help files and sample code, developers can add functionality or collaborate with other FLIR products to get the result they want in their application.

Key features:

- Supports communication and streaming using FireWire, Gigabit, RTSP, and USB interfaces.
- Gives the user full control of the camera.
- Supports recording of images using FireWire, Gigabit, RTSP, and USB interfaces.
- Converts 16-bit signal pixels into temperature data, for maximum user flexibility.
- Allows 16-bit temperature linear, histogram, and signal outputs.

General description

FLIR IR Camera Player is a PC-based remote control and viewer that you can use with cameras from FLIR Systems.

You can perform one or more of the following with FLIR IR Camera Player:

- Record a video stream from the camera.
- Save a frame from the video stream as a snapshot image (*.bmp).
- Autofocus, focus far, and focus near.
- Autoadjust the camera image.
- Freeze the camera image.
- Save a camera image in the camera.
- Change Color palette.
- Add an image description and a text comment to an image.

You connect a camera in one of the following ways:

- Ethernet
- FireWire
- USB

General description	
FLIR Reporter Professional is a powerful software for creating compelling and professional, fully customized, easy-to-interpret maintenance reports.	
Professional Report Wizard guides you step-by-step in combining all IR inspection data - infrared and visual images, temperature measurements, and text notes – into a professional, easy-to-interpret maintenance report.	
Key features:	
<ul style="list-style-type: none"> • Flexible report page design and layout for customized reports • Use quick insert function to easily create custom report pages • Fully integrated with standard Microsoft Word • Generates reports in standard MS Office format and PDF-format • Powerful temperature analysis • Triple Fusion Picture-in-Picture (movable, sizable, scalable) • Rapid report manager supporting automatic report generation by drag-and-drop • Support for MSX (Multi-Spectral Dynamic Imaging) images • Support for sketch images in both IR and visual with on/off toggling • Support for same FOV ("Field of View Match") • Grid settings • Trending functionality • Automatic link to Google™ Maps for images with GPS coordinates • Automatic summary table for the report • Fine tune images and make full temperature analysis directly in Microsoft Word • Spell check • Create your own formulas including measurement values from images • Play radiometric sequences directly in the report • Search functionality to quickly finding images for your report • Panorama tool for combining several images to a larger image • Support for GF series IR images • Auto Update function • Support for METERLiNK™ data • *.docx compatibility 	
Download	
Download your copy of FLIR Reporter Professional here:

General description
FLIR ResearchIR Max + HSDR 4 contains all the features of FLIR ResearchIR Max 4, plus support for FLIR High Speed Data Recorder (HSDR) products.
Main features:
<ul style="list-style-type: none"> • Pre/post-recording. • Mathematical processing toolbox. • Image filtering toolbox. • Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy. • View, record and store images at high speed. • Post-processing of fast thermal events. • Generate time-temperature plots from live images or recorded sequences. • Advanced start/stop recording conditions. • Unlimited number of analysis functions (spot, line, area). • File organizer. • Zoom and pan allows a closer look. • Multiple dockable objects for plots and statistics. • Export images and results to bitmap, video, Excel, MATLAB or CSV formats • Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.
FLIR ResearchIR Max + HSDR 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description

FLIR ResearchIR Max + HSDR 4 contains all the features of FLIR ResearchIR Max 4, plus support for FLIR High Speed Data Recorder (HSDR) products.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max + HSDR 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description

FLIR ResearchIR Max 4 is aimed at R&D and science professionals who use thermal imaging cameras with a cooled or uncooled detectors. FLIR ResearchIR Max makes the most of a thermal imaging camera, and allows high-speed recording and advanced thermal pattern analysis. FLIR ResearchIR Max is the perfect tool for industrial R&D.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

Shipping information

Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • FLIR ResearchIR Max 4 download card. • Hardware security device.
Packaging, weight	0.066 kg (0.15 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558007266
UPC-12	845188007638
Country of origin	Sweden

Compatible with the following products:

- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0401; FLIR T1050sc 12°

General description

FLIR ResearchIR Max 4.0 is aimed at R&D and science professionals who use thermal imaging cameras with a cooled or uncooled detectors. FLIR ResearchIR Max makes the most of a thermal imaging camera, and allows high-speed recording and advanced thermal pattern analysis. FLIR ResearchIR Max is the perfect tool for industrial R&D.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

Shipping information

Packaging, type	Cardboard box
List of contents	FLIR ResearchIR Max 4 download card, incl. license key.
Packaging, weight	0.066 kg (0.15 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558010457
UPC-12	845188011109
Country of origin	Sweden

Compatible with the following products:

- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°
- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)
- 55903-1016; FLIR T600 25° (incl. Wi-Fi and Ext. cal.)
- 55903-1022; FLIR T600 25° (incl. Wi-Fi)
- 55903-1007; FLIR T600 25° and 15° w/case
- 55903-1008; FLIR T600 25° and 45° w/case

General description

FLIR ResearchIR Standard 4.0 is aimed at the R&D benchtop testing environment for users of uncooled cameras. FLIR ResearchIR Standard provides the core analysis tools needed for rapid testing and assessment of thermal issues.

Main features:

- View live imagery from the camera
- Record snapshots or movies to disk.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Analysis by region (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, Excel, or CSV formats

FLIR ResearchIR Standard 4 in combination with a FLIR thermal imaging camera is the perfect solution for any benchtop testing application application.

Shipping information

List of contents	<ul style="list-style-type: none"> • FLIR ResearchIR Standard download card. • Hardware security device.
Packaging, weight	0.069 kg (0.15 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558008638
UPC-12	845188009151
Country of origin	Sweden

Compatible with the following products:

- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°

General description

FLIR Tools is a software suite specifically designed to provide an easy way to update your camera and create inspection reports.

Key features:

- Report templates (horizontal IR + DC, vertical IR + DC, horizontal IR + IR).
- Manual IR/Visual Image Grouping
- Import images from your camera to your computer.
- Apply filters when searching for images.

<p>General description</p> <p>FLIR Tools Mobile lets professional thermographers use an iPad, iPhone, or iPod touch to see and capture live, streaming infrared video and stills from select FLIR cameras.</p> <p>With FLIR Tools Mobile the camera can be stationed in one area and operated wirelessly from another – highly useful for IR inspections of energized equipment or performing IR surveys in hard-to-reach locations and harsh working environments. Streaming video and remote access also gives decision makers and others on your team a valuable opportunity to observe and collaborate in the thermal imaging process.</p>
<p>Using FLIR Tools Mobile, you can do one or more of the following:</p> <ul style="list-style-type: none"> • Import images from your infrared camera • Lay out and move measurement tools on the image • Read out temperature measurements • Zoom in on images • On the iPhone/iPad, remotely take snapshots when a camera is connected • On the camera, take snapshots that will automatically be saved in the iPhone/iPad • Delete any images on the iPhone/iPad • Display an image's GPS coordinates on Google Maps • Create and e-mail imagesheets • Create and e-mail reports • Print imagesheets and reports to any AirPrint-enabled printer • Save images to iPhone/iPad photo library • Send images to FTP sites and other file sharing services (Dropbox, Box.net, etc.) • Display image information, such as object parameters, text comments, file information, etc. • Play-back voice comments • Change level and span • Change general settings in the app • Change palette
<p>FLIR Tools Mobile lets you take control of the following features on selected cameras:</p> <ul style="list-style-type: none"> • Remote control of your FLIR camera. • Support for MSX (Multi-Spectral Dynamic Imaging) images. • Support for sketch images in both IR and visual with on/off toggling. • Support for same FOV ("Field of View Match"). • Editable text comments. • Auto and manual focus • Level and span • Color palettes • Temperature measurement analytics • Spot • Area box • Circle • Line • Parameter settings • Emissivity • Reflected temperature • Relative humidity • Atmospheric temperature • IR and visible light image blending • Picture-in-picture • Thermal fusion • Image storage • MPEG 4 video • Radiometric JPEG stills

General description

Compared to FLIR Tools, FLIR Tools+ has the following features:

- Radiometric Panorama incl. MSX
- Radiometric IR Video Recording
- Advanced Reporting

FLIR Tools/Tools+ is a software suite specifically designed to provide an easy way to update your camera and create inspection reports.

FLIR Tools+ main features:

- Manual IR/Visual Image Grouping
- Radiometric Panorama incl. MSX
- Radiometric IR Video Recording
- Advanced Reporting for Microsoft Office.
- Report templates (horizontal IR + DC, vertical IR + DC, horizontal IR + IR).
- Import images from your camera to your computer.
- Apply filters when searching for images.
- Search all text in images and text annotations.
- Store the five latest search criteria's.
- Lay out, move, and resize measurement tools on any infrared image.
- Create PDF imagesheets of any images of your choice.
- Add headers, footers, and logos to imagesheets.
- Create PDF reports for images of your choice.
- Add headers, footers, and logos to reports.
- Report editor (report page preview and snap to grid).
- Sort function (by date, groups sorted by path, and groups sorted by date).
- Browse and purchase infrared cameras, software, and accessories in the webshop.
- Software localized to 21 languages.
- Support for MSX (Multi-Spectral Dynamic Imaging) Images
- Support for Sketch Images on both IR and Visual with toggling ON/OFF feature.
- Support for Same FOV (Field of View Match)
- Display of Compass Information in Edit and in Report.
- Display of GPS Information in Edit and in Report.
- Camera update (applies to FLIR Ex, Kxx, Exx and T6xx series only).

General description

This wide angle lens has a field of view almost double that of the standard 25° lens. Perfect for wide or tall targets or when working in confined areas.

Imaging and optical data

Field of view (FOV)	45° × 34° (55° diagonally)
Minimum focus distance	150 mm (5.91 in.)
Focal length	13.1 mm (0.52 in.)
Spatial resolution (IFOV)	1.30 mrad
Lens identification	Automatic
F-number	1.0
Number of lenses	3 (3 asph)
MTF @ 70% of FOV	Normal requirements (52%)
Distortion	3%

Physical data

Weight	0.209 kg (0.461 lb.)
Size (L × D)	50 × 67 mm (1.97 × 2.64 in.)
Front lens diameter	30 mm (1.18 in.)

Shipping information

Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Lens • Lens case • Front lens cap • Rear lens cap
Packaging, weight	0.430 kg (0.95 lb.)
Packaging, size	172 × 131 × 133 mm (6.8 × 5.2 × 5.2 in.)
EAN-13	7332558004463
UPC-12	845188002688
Country of origin	Sweden

Compatible with the following products:

- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)

General description

The 15° lens is a popular lens accessory and provides 1.7x magnification compared to the standard lens. Ideal for small or distant targets such as overhead power lines.

Imaging and optical data

Field of view (FOV)	15° × 11° (19° diagonally)
Minimum focus distance	500 mm (19.69 in.)
Focal length	41.3 mm (1.63 in.)
Spatial resolution (IFOV)	0.41 mrad
Lens identification	Automatic
F-number	1.0
Number of lenses	3 (3 asph)
MTF @ 70% of FOV	Normal requirements (52%)
Distortion	3%

Physical data

Weight	0.190 kg (0.419 lb.)
Size (L × D)	47 × 67 mm (1.85 × 2.64 in.)
Front lens diameter	52 mm (2.05 in.)

Shipping information

Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Lens • Lens case • Front lens cap • Rear lens cap
Packaging, weight	0.427 kg (0.95 lb.)
Packaging, size	174 × 133 × 133 mm (6.85 × 5.24 × 5.24 in.)
EAN-13	7332558004449
UPC-12	845188002671
Country of origin	Sweden

Compatible with the following products:

- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)

General description

This wide angle lens has a field of view approximately three times that of the standard 25° lens. This lens is suitable for extremely cramped situations where the operator can not step farther back from the object.

Imaging and optical data

Field of view (FOV)	80° × 64.4° (92.8° diagonal)
Minimum focus distance	65 mm (2.6 in.)
Focal length	6.5 mm (0.26 in.)
Spatial resolution (IFOV)	2.62 mrad
Lens identification	Automatic
F-number	1.0
Number of lenses	5 (5 asph)
MTF @ 70% of FOV	Normal requirements (52%)
Distortion	5%

Physical data

Weight	0.428 kg (0.944 lb.)
Size (L × D)	126 × 67 mm (4.96 × 2.64 in.)
Front lens diameter	25 mm 0.98 in.)

Shipping information

Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Lens • Lens case • Front lens cap • Rear lens cap
Packaging, weight	0.680 kg (1.5 lb.)
Packaging, size	174 × 133 × 133 mm (6.9 × 5.2 × 5.2 in.)
EAN-13	7332558004418
UPC-12	845188004415
Country of origin	Sweden

General description

The 7° lens is a popular accessory and provides 3.6× magnification compared to the standard lens. Ideal for small or distant targets such as overhead power lines.

Imaging and optical data

Field of view (FOV)	7° × 5.3° (8.7° diagonally)
Minimum focus distance	2.0 m (6.6 ft.)
Focal length	88.9 mm (3.5 in.)
Spatial resolution (IFOV)	0.19 mrad
Lens identification	Automatic
F-number	1.3
Number of lenses	3 (3 asph)
MTF @ 70% of FOV	Normal requirements (52%)
Distortion	3%

Physical data

Weight	0.77 kg (0.70 lb.)
Weight, lens	0.71 kg (1.57 lb.)
Size (L × D)	96 × 126 mm (3.78 × 4.96 in.), excluding support
Front lens diameter	96 mm (3.78 in.)

Shipping information

Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Lens • Lens case • Front lens cap • Rear lens cap • Mounting support • Lens mounting instructions
Packaging, weight	1.63 kg (3.58 lb.)
Packaging, size	385 × 308 × 165 mm (15.2 × 12.1 × 6.5 in.)
EAN-13	7332558004425
UPC-12	845188004422
Country of origin	Sweden

Compatible with the following products:

- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)
- 55903-1016; FLIR T600 25° (incl. Wi-Fi and Ext. cal.)
- 55903-1022; FLIR T600 25° (incl. Wi-Fi)
- 55903-1007; FLIR T600 25° and 15° w/case

IR lens, f=88.9 mm (7°) with case and support for T6xx

General description	
This device is a viewport which consist of a crystal "glass" window, mounted in an aluminum frame. The glass is specially formulated to allow transmission of infrared light to allow use of infrared thermal sensing equipment without opening the enclosure. This device is intended for installation in doors or walls of electrical enclosures without compromising the integrity of the enclosure.	

Power system	
Voltage	Any range

Environmental data	
Environment	Indoor/outdoor type 4/12
Operating temperature range	Maximum: 260°C (500°F)
Storage temperature range	Optics, maximum: 1357°C (2474°F)

Physical data	
Size (L x W x H)	25.5 x 73 x 86 mm (1.0 x 2.87 x 3.36 in.)
Viewing aperture diameter	45 mm (1.77 in.)
Material	Optics: CaF2 (Calcium Fluoride Crystal) Body: Anodized aluminum Hardware: steel
Comments to physical data	Required hole diameter, nominal: 60.3 mm (2.375 in.) Greenlee Punch: 76BB Maximum pullout strength: 658 kg (1450 lb.)

Lens	
Waveband	Broadband IR: short-, mid-, and longwave
Visible light spectrum	Yes

Certifications	
Certification	UL, IP67, NEMA Type 4/12, CSA

Shipping information	
Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • IR window • Case • Mounting instruction • Additional safety screw
Packaging, weight	0.24 kg (0.53 lb.)
Packaging, size	120 x 115 x 40 mm (4.7 x 4.5 x 1.6 in.)

General description	
High capacity battery for the IR camera.	

Power system	
Battery type	Rechargeable Li ion battery
Battery voltage	3.7 V
Battery capacity	7.8 Ah
Charging system	In camera (AC adapter or 12 V from a vehicle) or 2-bay charger
Charging time	2.5 h to 90% capacity, charging status indicated by LED's
Charging temperature	0°C to +45°C (+32°F to +113°F)

Environmental data	
Battery storage temperature range	-40°C to +70°C (-40°F to +158°F)

Physical data	
Battery weight	0.173 kg (0.38 lb.)
Size (L x W x H)	84 x 49 x 60 mm (3.3 x 1.9 x 2.4 in.)

Shipping information	
Packaging, type	Cardboard box
Packaging, weight	0.272 kg (0.6 lb.)
Packaging, size	183 x 136 x 63 mm (7.2 x 5.4 x 2.5 in.)
EAN-13	7332558004456
UPC-12	845188004453
Country of origin	Sweden

Compatible with the following products:

- 72501-0101; FLIR T1020 12°
- 72501-0102; FLIR T1020 28°
- 72501-0103; FLIR T1020 45°
- 72501-0104; FLIR T1020 28° and 12°
- 72501-0105; FLIR T1020 28° and 45°
- 72501-0106; FLIR T1020 28°, 12°, and 45°
- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0301; FLIR T1040 12°
- 72501-0302; FLIR T1040 28°
- 72501-0303; FLIR T1040 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°
- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)

Li-Ion Battery pack 3.7V 29Wh

General description

The Extended Warranty Package covers parts and labour for your IR camera, consumables not included.

FLIR Systems warrants its products to be free from defects caused by faulty material or poor workmanship, for a period specified above. **NO PRODUCT IS WARRANTED TO BE MERCHANTABILITY OR FIT FOR ANY PARTICULAR USE OR APPLICATION.** The warranty is void if the buyer damages the item due to misuse, abuse, modification, processing, or integration with other items. FLIR Systems' maximum liability under this warranty is limited to the obligation to replace or, at its sole option, to credit Buyer's account up to the purchase price.

General description	
FLIR P/B/SC6xx and FLIR GF3xx series: Power supply, including multiple plugs, to charge the battery when it is inside or outside of the camera.	
FLIR T6xx and FLIR Exx series: Power supply, including multiple plugs, to charge the battery when it is inside the camera or in the battery charger.	
Power system	
AC operation	100–240 VAC, 50/60 Hz, 12 VDC out
Power	3000 mA at 12 VDC
Physical data	
Cable length	1.98 m (6.5 ft.)
Shipping information	
Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Power supply including cable • EU plug • UK plug • US plug • AU plug
Packaging, weight	0.324 kg (9.7 lb.)
Packaging, size	152 × 78 × 73 mm (6.0 × 3.1 × 2.9 in.)
EAN-13	7332558003794 4743254001763 (Estonia plant)
UPC-12	845188002145
Country of origin	Sweden

Part name	IRW-2S
Material number	19250-200
Part description	Stainless steel IR window, 2" diameter
<p>This device is a viewport that consist of a crystal "glass" window mounted in an aluminum frame. The glass is specially formulated to allow transmission of infrared (IR) light to allow use of IR thermal sensing equipment without opening the enclosure. This device is intended for installation in doors or walls of electrical enclosures without compromising the integrity of the enclosure.</p>	

Power system	
Voltage	Any range

Lens	
Waveband	Broadband IR: short-, mid-, and longwave
Visible light spectrum	Yes

Certifications	
Certifications	UL, IP67, NEMA Type 4/12, CSA

Physical data	
Weight	0.5 kg (1 lb.)
Dimensions (H x W x L)	26.9 mm x 99 mm x 107 mm (1.05" x 3.89" x 4.22")
Material	Optics: CaF ₂ (calcium fluoride crystal). Body: stainless steel AISI 316. Hardware: steel
Color	Metallic silver

Shipping information	
Packaging type	Color box
Packaging contents	<ul style="list-style-type: none"> IR window Case Mounting instructions Additional safety screw
Unit weight	0.54 kg (1.2 lb)
Each dimensions (H x W x L)	38.1 mm x 107.95 mm x 127 mm (1.5" x 4.25" x 5")

Part name	IRW-4S
Material number	19252-200
Part description	Stainless steel IR window, 4" diameter
<p>This device is a viewport that consist of a crystal "glass" window mounted in an aluminum frame. The glass is specially formulated to allow transmission of infrared (IR) light to allow use of IR thermal sensing equipment without opening the enclosure. This device is intended for installation in doors or walls of electrical enclosures without compromising the integrity of the enclosure.</p>	

Power system	
Voltage	Any range

Environmental	
Environment	Indoor/outdoor type 4/12
Operating temperature range	Maximum: 260°C (500°F)
Storage temperature range	Optics, maximum: 1357°C (2474°F)

Certifications	
Certifications	UL, IP67, NEMA Type 4/12, CSA

Physical data	
Weight:	1.18 kg (2.6 lb.)
Dimensions (H x W x L)	26.9 mm x 99 mm x 107 mm (1.05" x 3.89" x 4.22")
Material	Optics: CaF ₂ (calcium fluoride crystal). Body: stainless steel AISI 316. Hardware: steel
Color	Metallic silver

Lens	
Waveband	Broadband IR: short-, mid-, and longwave
Visible light spectrum	Yes

Shipping information	
Packaging type	Color box
Packaging contents	<ul style="list-style-type: none"> IR window Case Mounting instruction Additional safety screw
Unit weight	1.32 kg (2.9 lb.)

SS IR window 4"

General description	
High capacity battery for the IR camera.	
Power system	
Battery type	Rechargeable Li ion battery
Battery voltage	3.65 V
Battery capacity	8.5 Ah
Charging system	In camera (AC adapter or 12 V from a vehicle) or 2-bay charger
Charging time	2.5 h to 90% capacity, charging status indicated by LED's
Charging temperature	0°C to +45°C (+32°F to +113°F)
Environmental data	
Battery storage temperature range	-40°C to +70°C (-40°F to +158°F)
Physical data	
Battery weight	0.182 kg (0.40 lb.)
Size (L x W x H)	84 x 49 x 60 mm (3.3 x 1.9 x 2.4 in.)
Shipping information	
Packaging, type	Cardboard box
Packaging, weight	0.281 kg (0.62 lb.)
Packaging, size	183 x 136 x 63 mm (7.2 x 5.4 x 2.5 in.)
EAN-13	7332558011799
UPC-12	845188012885
Country of origin	Sweden

Compatible with the following products:

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°
- 72502-0503; FLIR T1010 45°
- 72501-0101; FLIR T1020 12°
- 72501-0102; FLIR T1020 28°
- 72501-0104; FLIR T1020 28° and 12°
- 72501-0105; FLIR T1020 28° and 45°
- 72501-0106; FLIR T1020 28°, 12°, and 45°
- 72501-0103; FLIR T1020 45°
- 72501-0201; FLIR T1030sc 12°

General description	
The close-up lens is attached to the standard 28° IR lens and provides three times magnification. The close-up lens is intended for R&D usage or development purposes. As an example, for studies of PCBs and small electronic components.	

Imaging and optical data	
Field of view (FOV)	52° × 40° (66° diagonal)
Magnifying factor	3x
Working distance	97 mm (3.8 in.)
Depth of field	0.5 mm (0.02 in.)
Focal length	50 mm (2.0 in.)
Spatial resolution (IFOV)	51 μm
Lens identification	No
F-number	1.15
Number of lenses	2 (2 asph)
Distortion	0.4%

Physical data	
Weight	0.620 kg (1.37 lb.)
Size (L × D)	127.5 × 91 mm (5.02 × 3.58 in.)
Front lens diameter	76 mm (3.0 in.)

Shipping information	
Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Lens • Lens case • Front lens cap • Rear lens cap • Mounting instruction
Packaging, weight	0.96 kg (2.1 lb.)
Packaging, size	173 × 135 × 135 mm (6.81 × 5.31 × 5.31 in.)
EAN-13	7332558011003
UPC-12	845188011857
Country of origin	Sweden

Close-up lens 3× (51 μm) with case

General description	
The FLIR Atlas SDK for .NET is a software development kit that enables developers to create applications. Supported by help files and sample code, developers can add functionality or collaborate with other FLIR products to get the result they want in their application.	
Key features:	
<ul style="list-style-type: none"> • Supports communication and streaming using FireWire, Gigabit, RTSP, and USB interfaces. • Gives the user full control of the camera. • Supports recording of images using FireWire, Gigabit, RTSP, and USB interfaces. • Converts 16-bit signal pixels into temperature data, for maximum user flexibility. • Allows 16-bit temperature linear, histogram, and signal outputs. 	
Release notes	
Version	3.1
Shipping information	
Packaging, type	Cardboard box
List of contents	Download card with printed license key
Packaging, weight	0.056 kg (0.123 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558011126
UPC-12	845188012014
Country of origin	Sweden
System requirements	
Operating system	<ul style="list-style-type: none"> • Windows 7 (32- and 64-bit) • Windows 8 (32- and 64-bit) • Windows 10 (32- and 64-bit)

General description	
The FLIR Atlas SDK for MATLAB is a software development kit that enables developers to create applications. Supported by help files and sample code, developers can add functionality or collaborate with other FLIR products to get the result they want in their application.	
Key features:	
<ul style="list-style-type: none"> • Supports communication and streaming using FireWire, Gigabit, RTSP, and USB interfaces. • Gives the user full control of the camera. • Supports recording of images using FireWire, Gigabit, RTSP, and USB interfaces. • Converts 16-bit signal pixels into temperature data, for maximum user flexibility. • Allows 16-bit temperature linear, histogram, and signal outputs. 	
Release notes	
Version	3.1
Shipping information	
Packaging, type	Cardboard box
List of contents	Download card with printed license key
Packaging, weight	0.056 kg (0.123 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558011133
UPC-12	845188012021
Country of origin	Sweden
System requirements	
Operating system	MATLAB 2015 (32- and 64-bit) and one of the following operating systems: <ul style="list-style-type: none"> • Windows 7 (32- and 64-bit) • Windows 8 (32- and 64-bit) • Windows 10 (32- and 64-bit)

Compatible with the following products:

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°
- 72502-0503; FLIR T1010 45°
- 72501-0101; FLIR T1020 12°
- 72501-0102; FLIR T1020 28°
- 72501-0104; FLIR T1020 28° and 12°
- 72501-0105; FLIR T1020 28° and 45°
- 72501-0106; FLIR T1020 28°, 12°, and 45°
- 72501-0103; FLIR T1020 45°
- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0301; FLIR T1040 12°
- 72501-0302; FLIR T1040 28°
- 72501-0303; FLIR T1040 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°
- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)
- 55903-1016; FLIR T600 25° (incl. Wi-Fi and Ext. cal.)

General description

FLIR IR Camera Player is a PC-based remote control and viewer that you can use with cameras from FLIR Systems.

You can perform one or more of the following with FLIR IR Camera Player:

- Record a video stream from the camera.
- Save a frame from the video stream as a snapshot image (*.bmp).
- Autofocus, focus far, and focus near.
- Autoadjust the camera image.
- Freeze the camera image.
- Save a camera image in the camera.
- Change Color palette.
- Add an image description and a text comment to an image.

You connect a camera in one of the following ways:

- Ethernet
- FireWire
- USB

General description

FLIR ResearchIR Max + HSDR 4 contains all the features of FLIR ResearchIR Max 4, plus support for FLIR High Speed Data Recorder (HSDR) products.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max + HSDR 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

General description
FLIR ResearchIR Max + HSDR 4 contains all the features of FLIR ResearchIR Max 4, plus support for FLIR High Speed Data Recorder (HSDR) products.
Main features:
<ul style="list-style-type: none"> • Pre/post-recording. • Mathematical processing toolbox. • Image filtering toolbox. • Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy. • View, record and store images at high speed. • Post-processing of fast thermal events. • Generate time-temperature plots from live images or recorded sequences. • Advanced start/stop recording conditions. • Unlimited number of analysis functions (spot, line, area). • File organizer. • Zoom and pan allows a closer look. • Multiple dockable objects for plots and statistics. • Export images and results to bitmap, video, Excel, MATLAB or CSV formats • Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.
FLIR ResearchIR Max + HSDR 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

Shipping information	
Packaging, type	Cardboard box
List of contents	FLIR ResearchIR Max + HSDR 4 download card, incl. license key.
Packaging, weight	0.068 kg (0.15 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558010495
UPC-12	845188011147
Country of origin	Sweden

Compatible with the following products:

- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°
- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)
- 55903-1016; FLIR T600 25° (incl. Wi-Fi and Ext. cal.)
- 55903-1022; FLIR T600 25° (incl. Wi-Fi)
- 55903-1007; FLIR T600 25° and 15° w/case
- 55903-1008; FLIR T600 25° and 45° w/case

General description

FLIR ResearchIR Max 4 is aimed at R&D and science professionals who use thermal imaging cameras with a cooled or uncooled detectors. FLIR ResearchIR Max makes the most of a thermal imaging camera, and allows high-speed recording and advanced thermal pattern analysis. FLIR ResearchIR Max is the perfect tool for industrial R&D.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

Shipping information

Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • FLIR ResearchIR Max 4 download card. • Hardware security device.
Packaging, weight	0.066 kg (0.15 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558007266
UPC-12	845188007638
Country of origin	Sweden

Compatible with the following products:

- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0401; FLIR T1050sc 12°

General description

FLIR ResearchIR Max 4 is aimed at R&D and science professionals who use thermal imaging cameras with a cooled or uncooled detectors. FLIR ResearchIR Max makes the most of a thermal imaging camera, and allows high-speed recording and advanced thermal pattern analysis. FLIR ResearchIR Max is the perfect tool for industrial R&D.

Main features:

- Pre/post-recording.
- Mathematical processing toolbox.
- Image filtering toolbox.
- Radiometric digital detail enhancement (DDE) improves dramatically the understanding of the thermal image, while maintaining radiometric measurement accuracy.
- View, record and store images at high speed.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Advanced start/stop recording conditions.
- Unlimited number of analysis functions (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, video, Excel, MATLAB or CSV formats
- Local scale gain control on measurement - automatically adjusts the contrast in a specific part of the image.

FLIR ResearchIR Max 4 in combination with a FLIR thermal imaging camera is the perfect solution for any R&D or scientific application. It will allow researchers in all fields to make the smallest of temperature differences visible and to thoroughly analyze the thermal process in real-time.

Shipping information

Packaging, type	Cardboard box
List of contents	FLIR ResearchIR Max 4 download card, incl. license key.
Packaging, weight	0.066 kg (0.15 lb.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558010488
UPC-12	845188011130
Country of origin	Sweden

Compatible with the following products:

- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0401; FLIR T1050sc 12°
- 72501-0402; FLIR T1050sc 28°
- 72501-0403; FLIR T1050sc 45°
- 55903-1015; FLIR T600 15° (incl. Wi-Fi and Ext. cal.)
- 55903-0922; FLIR T600 15° (incl. Wi-Fi)
- 55903-1016; FLIR T600 25° (incl. Wi-Fi and Ext. cal.)
- 55903-1022; FLIR T600 25° (incl. Wi-Fi)
- 55903-1007; FLIR T600 25° and 15° w/case
- 55903-1008; FLIR T600 25° and 45° w/case

General description

FLIR ResearchIR Standard 4 is aimed at the R&D benchtop testing environment for users of uncooled cameras. FLIR ResearchIR Standard provides the core analysis tools needed for rapid testing and assessment of thermal issues.

Main features:

- View live imagery from the camera
- Record snapshots or movies to disk.
- Post-processing of fast thermal events.
- Generate time-temperature plots from live images or recorded sequences.
- Analysis by region (spot, line, area).
- File organizer.
- Zoom and pan allows a closer look.
- Multiple dockable objects for plots and statistics.
- Export images and results to bitmap, Excel, or CSV formats

FLIR ResearchIR Standard 4 in combination with a FLIR thermal imaging camera is the perfect solution for any benchtop testing application application.

General description
FLIR ResearchIR Standard 4 is aimed at the R&D benchtop testing environment for users of uncooled cameras. FLIR ResearchIR Standard provides the core analysis tools needed for rapid testing and assessment of thermal issues.
Main features:
<ul style="list-style-type: none"> • View live imagery from the camera • Record snapshots or movies to disk. • Post-processing of fast thermal events. • Generate time-temperature plots from live images or recorded sequences. • Analysis by region (spot, line, area). • File organizer. • Zoom and pan allows a closer look. • Multiple dockable objects for plots and statistics. • Export images and results to bitmap, Excel, or CSV formats
FLIR ResearchIR Standard 4 in combination with a FLIR thermal imaging camera is the perfect solution for any benchtop testing application application.

General description	
FLIR Tools Mobile is an intuitive Android app for analyzing, managing, and distributing infrared images.	
Key features:	
<ul style="list-style-type: none"> • Remote control • MSX • Images with sketch on DC and IR • Images with field of view follow • Editable text comments • Emissivity table • Import images from your Wi-Fi-enabled camera. • Connect and stream infrared images from the camera. • Connect and stream measurement data from FLIR Test & Measurement meters • Lay out and move measurement tools on the image. • Read out temperature measurements. • Create and configure temporal plots based on results of measurement tools on the infrared image. • Log measurement data and export it as a *.csv file. • Save a measurement scenario as a data snapshot. • Zoom in on images. • On the Android device, remotely take snapshots when a camera is connected. • On the camera, take snapshots that will automatically be saved on the Android device. • Delete images on the Android device. • Display an image's GPS coordinates on Google Maps. • Create and e-mail reports. • Save images in the Android device photo library. • Send images to FTP sites and other file-sharing services (Dropbox, Box.net, etc.). • Display image information, e.g., object parameters, text comments, and file details. • Play back voice comments. • Change the level and span. • Change general settings in the app. • Change the palette. 	
Download	
The application can be downloaded from Android Market or Amazon Marketplace, see the link below.	
https://market.android.com/details?id=com.flir.viewer	
Release notes	
Version	3.8.0
New features	Main improvements in version 3.8.0: <ul style="list-style-type: none"> • Fixed loading of Japanese help files. • Fixed import bug for Samsung S6. • Fixed opening image taken from CAT S60. • Support for Ex, C3, and the new Exx cameras. • Import from Work folders. • Area measurement and length measurement feature based on object distance. • Various bug fixes.

<p>General description</p> <p>FLIR Tools Mobile lets professional thermographers use an iPad, iPhone, or iPod touch to see and capture live, streaming infrared video and stills from select FLIR cameras.</p> <p>With FLIR Tools Mobile the camera can be stationed in one area and operated wirelessly from another – highly useful for IR inspections of energized equipment or performing IR surveys in hard-to-reach locations and harsh working environments. Streaming video and remote access also gives decision makers and others on your team a valuable opportunity to observe and collaborate in the thermal imaging process.</p>
<p>Using FLIR Tools Mobile, you can do one or more of the following:</p> <ul style="list-style-type: none"> • Import images from your infrared camera • Lay out and move measurement tools on the image • Read out temperature measurements • Zoom in on images • On the iPhone/iPad, remotely take snapshots when a camera is connected • On the camera, take snapshots that will automatically be saved in the iPhone/iPad • Delete any images on the iPhone/iPad • Display an image's GPS coordinates on Google Maps • Create and e-mail imagesheets • Create and e-mail reports • Print imagesheets and reports to any AirPrint-enabled printer • Save images to iPhone/iPad photo library • Send images to FTP sites and other file sharing services (Dropbox, Box.net, etc.) • Display image information, such as object parameters, text comments, file information, etc. • Play-back voice comments • Change level and span • Change general settings in the app • Change palette
<p>FLIR Tools Mobile lets you take control of the following features on selected cameras:</p> <ul style="list-style-type: none"> • Remote control of your FLIR camera. • Support for MSX (Multi-Spectral Dynamic Imaging) images. • Support for sketch images in both IR and visual with on/off toggling. • Support for same FOV ("Field of View Match"). • Editable text comments. • Auto and manual focus • Level and span • Color palettes • Temperature measurement analytics • Spot • Area box • Circle • Line • Parameter settings • Emissivity • Reflected temperature • Relative humidity • Atmospheric temperature • IR and visible light image blending • Picture-in-picture • Thermal fusion • Image storage • MPEG 4 video • Radiometric JPEG stills

General description

Compared to FLIR Tools, FLIR Tools+ has the following features:

- Radiometric Panorama incl. MSX
- Radiometric IR Video Recording
- Advanced Reporting

FLIR Tools/Tools+ is a software suite specifically designed to provide an easy way to update your camera and create inspection reports.

FLIR Tools+ main features:

- Manual IR/Visual Image Grouping
- Radiometric Panorama incl. MSX
- Radiometric IR Video Recording
- Advanced Reporting for Microsoft Office.
- Report templates (horizontal IR + DC, vertical IR + DC, horizontal IR + IR).
- Import images from your camera to your computer.
- Apply filters when searching for images.
- Search all text in images and text annotations.
- Store the five latest search criteria's.
- Lay out, move, and resize measurement tools on any infrared image.
- Create PDF imagesheets of any images of your choice.
- Add headers, footers, and logos to imagesheets.
- Create PDF reports for images of your choice.
- Add headers, footers, and logos to reports.
- Report editor (report page preview and snap to grid).
- Sort function (by date, groups sorted by path, and groups sorted by date).
- Browse and purchase infrared cameras, software, and accessories in the webshop.
- Software localized to 21 languages.
- Support for MSX (Multi-Spectral Dynamic Imaging) Images
- Support for Sketch Images on both IR and Visual with toggling ON/OFF feature.
- Support for Same FOV (Field of View Match)
- Display of Compass Information in Edit and in Report.
- Display of GPS Information in Edit and in Report.
- Camera update (applies to FLIR Ex, Kxx, Exx and T6xx series only).

General description	
This cable is used to connect the infrared camera with an external display.	

Physical data	
Weight	159 g (5.6 oz.)
Cable length	1.5 m (4.9 ft.)
Connector	HDMI type C to DVI

Shipping information	
Packaging, type	Cardboard box
Packaging, weight	221 g (7.8 oz.)
Packaging, size	202 × 146 × 25 mm (8.0 × 5.7 × 1.0 in.)
EAN-13	7332558006290
UPC-12	845188006648
Country of origin	Sweden

Compatible with the following products:

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°
- 72502-0503; FLIR T1010 45°

General description	
The 45° has a field of view approximately two times that of the standard 28° lens. This wide angle lens is suitable for cramped situations where the operator cannot step farther back from the object.	
Imaging and optical data	
Field of view (FOV)	45° × 34° (55.2° diagonal)
Minimum focus distance	0.2 m (0.66 ft.)
Focal length	21.2 mm (0.83 in.)
Spatial resolution (IFOV)	0.80 mrad
Lens identification	Automatic
F-number	1.1
Number of lenses	4 (4 asph)
Distortion	1.71%
Physical data	
Weight	0.754 kg (1.66 lb.)
Size (L × D)	96.9 × 91 mm (3.82 × 3.58 in.)
Front lens diameter	59 mm (2.3 in.)
Shipping information	
Packaging, type	Cardboard box
List of contents	<ul style="list-style-type: none"> • Lens • Lens case • Front lens cap • Rear lens cap • Mounting instruction
Packaging, weight	1.1 kg (2.4 lb.)
Packaging, size	173 × 135 × 135 mm (6.81 × 5.31 × 5.31 in.)
EAN-13	7332558010990
UPC-12	845188011840
Country of origin	Sweden

Compatible with the following products

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°
- 72502-0503; FLIR T1010 45°

IR lens f=21.2 mm (45°) with case

General description	
High capacity battery for the IR camera.	
Power system	
Battery type	Rechargeable Li ion battery
Battery voltage	3.7 V
Battery capacity	7.8 Ah
Charging system	In camera (AC adapter or 12 V from a vehicle) or 2-bay charger
Charging time	2.5 h to 90% capacity, charging status indicated by LED's
Charging temperature	0°C to +45°C (+32°F to +113°F)
Environmental data	
Battery storage temperature range	-40°C to +70°C (-40°F to +158°F)
Physical data	
Battery weight	0.173 kg (0.38 lb.)
Size (L x W x H)	84 x 49 x 60 mm (3.3 x 1.9 x 2.4 in.)
Shipping information	
Packaging, type	Cardboard box
Packaging, weight	0.272 kg (0.6 lb.)
Packaging, size	183 x 136 x 63 mm (7.2 x 5.4 x 2.5 in.)
EAN-13	7332558004456
UPC-12	845188004453
Country of origin	Sweden

Compatible with the following products:

- 72501-0101; FLIR T1020 12°
- 72501-0102; FLIR T1020 28°
- 72501-0103; FLIR T1020 45°
- 72501-0104; FLIR T1020 28° and 12°
- 72501-0105; FLIR T1020 28° and 45°
- 72501-0106; FLIR T1020 28°, 12°, and 45°
- 72501-0201; FLIR T1030sc 12°
- 72501-0202; FLIR T1030sc 28°
- 72501-0203; FLIR T1030sc 45°
- 72501-0301; FLIR T1040 12°
- 72501-0302; FLIR T1040 28°
- 72501-0303; FLIR T1040 45°

General description	
Tool belt for FLIR camera pouches.	

Physical data	
Weight	0.117 kg (0.26 lb.)
Length	1.44 m (4.7 ft.)
Color	Black

Shipping information	
Packaging, type	Cardboard box
List of contents	• Tool belt
Packaging, weight	0.318 kg (0.7 lb.)
Packaging, size	243 × 165 × 82 mm (9.6 × 6.5 × 3.2 in.)
EAN-13	7332558003442 4743254000384 (Estonia plant)
UPC-12	845188003210
Country of origin	Estonia

Compatible with the following products:

- 72502-0501; FLIR T1010 12°
- 72502-0502; FLIR T1010 28°

<http://support.flir.com>

General description	
<p>The core of the course (2 days) consists of lectures on theoretical subjects, plus hands-on practice. Additional days can be booked (ITC-ADV-3006). After a general review of heat and heat transfer, the participants will learn about radiative heat transfer. Starting with the standard measurement situation they will learn about the importance of emissivity and the reflected apparent temperature. The participants will compute and estimate emissivity and compensate for the reflected apparent temperature. They will also learn about calibration and FLIR's HyperCal software. Depending on the needs of the participants and the time available, additional topics to be covered may include measurement through windows, measurable figures of merit, signal generation, the influence of integration time, read-out integrated circuits (ROICs), etc., triggering and synchronization, and non-uniformity correction (NUC) and bad pixel replacement.</p>	
Content	
<ul style="list-style-type: none"> • Introduction. • Review of thermal transfer. • Radiative heat transfer. • What does a camera see? Definition of a standard measurement situation. • Computing the emissivity. Estimating the emissivity and reflected apparent temperature(with practice). • From radiation to signal. • Measurable figures of merit (with practice). • Triggering and synchronization (additional content, on request, with practice). • Measuring through a window (additional content, on request, with practice). • Calibration (additional content, on request, with practice). • Spectral filters (additional content, on request, with practice). • NUC and bad pixel replacement (additional content, on request, with practice). • Transient, lock-in and pulse, and the basics of non-destructive testing (NDT) (additional content, on request). 	
Laboratory sessions	
<ul style="list-style-type: none"> • Practice according to the content listed above. 	

Course information	
Available languages	English. Other languages on request.
Target group	<ul style="list-style-type: none"> • Users of FLIR cooled thermal cameras and systems (cameras connected to a PC with, for example, the software Altair, AltairLI, or Thesa). • Users of uncooled thermal cameras with an interest in advanced thermal measurement applications.
Typical student	<ul style="list-style-type: none"> • Laboratory and industry technical personnel. • Researchers and scientists. • University students. • Persons working with NDT.
Prerequisites	<ul style="list-style-type: none"> • None.
Recommendations	<ul style="list-style-type: none"> • Basic knowledge of thermography and related areas. • Experience of measurement techniques and general software skills.

General description

The core of the course (2 days) consists of lectures on theoretical subjects, plus hands-on practice. Additional days can be booked (ITC-ADV-3006). After a general review of heat and heat transfer, the participants will learn about radiative heat transfer. Starting with the standard measurement situation they will learn about the importance of emissivity and the reflected apparent temperature. The participants will compute and estimate emissivity and compensate for the reflected apparent temperature. They will also learn about calibration and FLIR's HyperCal software. Depending on the needs of the participants and the time available, additional topics to be covered may include measurement through windows, measurable figures of merit, signal generation, the influence of integration time, read-out integrated circuits (ROICs), etc., triggering and synchronization, and non-uniformity correction (NUC) and bad pixel replacement.

Content

- Introduction.
- Review of thermal transfer.
- Radiative heat transfer.
- What does a camera see? Definition of a standard measurement situation.
- Computing the emissivity. Estimating the emissivity and reflected apparent temperature (with practice).
- From radiation to signal.
- Measurable figures of merit (with practice).
- Triggering and synchronization (additional content, on request, with practice).
- Measuring through a window (additional content, on request, with practice).
- Calibration (additional content, on request, with practice).
- Spectral filters (additional content, on request, with practice).
- NUC and bad pixel replacement (additional content, on request, with practice).
- Transient, lock-in and pulse, and the basics of non-destructive testing (NDT) (additional content, on request).

Labs

- Practice according to content listed above

Course information

Available languages	English. Other languages on request.
Target group	<ul style="list-style-type: none"> • Users of FLIR cooled thermal cameras and systems (cameras connected to a PC with, for example, the software Altair, AltairLI, or Thesa). • Users of uncooled thermal cameras with an interest in advanced thermal measurement applications.
Typical student	<ul style="list-style-type: none"> • Laboratory and industry technical personnel. • Researchers and scientists. • University students. • Persons working with NDT.
Prerequisites	<ul style="list-style-type: none"> • None.
Recommendations	<ul style="list-style-type: none"> • Basic knowledge of thermography and related areas. • Experience of measurement techniques and general software skills.

General description

This course prepares the student for qualification as a Category 1 certified thermographer. The participant will learn about the basics of infrared, how to operate an infrared camera under different conditions and for various purposes, how to appropriately judge the measurement situation in the field, and how to identify potential error sources. After the course, the participant will be able to undertake infrared inspections following written guidelines and to report the results of this inspection.

Note: This part number is reserved for adding additional students to a Category 1 on-site course.

Content

- Introduction to thermography.
- Understand your thermal camera.
- Basic physics of heat.
- Basic physics of infrared.
- Thermal pattern recognition and infrared applications.
- Infrared temperature measurement techniques.
- Thermography in condition-monitoring.
- Applications and inspections.
- Surveys and reporting.

Student presentation

- During the seminar, students will generate a small case study to be presented to the class, based on the laboratory exercises.

Laboratory sessions

- Camera handling.
- Level and span.
- Conduction pattern.
- Forced convection.
- Direct and indirect thermal measurement.
- Thermal capacity.
- Steady state and transient heat flow.
- Evaporation and condensation.
- Electrical application.
- Emissivity and reflected apparent temperature.
- Spatial resolution.
- Location and temperature measurement of a hot/cold spot.
- Image transfer to the computer.

Course information

Available languages

Chinese, Danish, Dutch, English, Finish, French, German, Greek, Hebrew, Italian, Japanese, Korean, Norwegian, Polish, Portuguese (Brazilian), Romanian, Russian, Serbo-Croatian, Spanish, Swedish, Thai.

General description	
This course prepares the student for qualification as a category 1 certified thermographer. The participant will learn about the basics of infrared, how to operate an infrared camera under different conditions and for various purposes, how to appropriately judge the measurement situation in the field, and how to identify potential error sources. After the course, the participant will be able to undertake infrared inspections following written guidelines and to report the results of this inspection.	
Content	
<ul style="list-style-type: none"> • Introduction to thermography. • Understand your thermal camera. • Basic physics of heat. • Basic physics of infrared. • Thermal pattern recognition and infrared applications. • Infrared temperature measurement techniques. • Thermography in condition-monitoring. • Applications and inspections. • Surveys and reporting. 	
Student presentation	
<ul style="list-style-type: none"> • During the seminar, students will generate a small case study to be presented to the class, based on the laboratory exercises. 	
Laboratory sessions	
<ul style="list-style-type: none"> • Camera handling. • Level and span. • Conduction pattern. • Forced convection. • Direct and indirect thermal measurement. • Thermal capacity. • Steady state and transient heat flow. • Evaporation and condensation. • Electrical application. • Emissivity and reflected apparent temperature. • Spatial resolution. • Location and temperature measurement of a hot/cold spot. • Image transfer to the computer. 	
Course information	
Available languages	Chinese, Danish, Dutch, English, Finnish, French, German, Greek, Hebrew, Italian, Japanese, Korean, Norwegian, Polish, Portuguese (Brazilian), Romanian, Russian, Serbo-Croatian, Spanish, Swedish, Thai.
Target group	<ul style="list-style-type: none"> • Practical users. • Beginners in thermography with some experience of camera handling and limited infrared knowledge who want to take their first step to becoming a professional thermographer and to qualifying as a Category 1 certified thermographer.

Course information	
Typical student	<ul style="list-style-type: none"> Persons with a professional technical background such as technicians, engineers, consultants, or researchers who work in maintenance, building inspection, mechanical, or electrical applications, production, or R&D. Persons who already have some basic experience of infrared thermography. Persons with knowledge of the basic functions of an infrared camera. Persons who want to become a certified thermographer to gain a competitive advantage or who need the certification because of legal reasons or company internal regulations.
Prerequisites	<ul style="list-style-type: none"> Familiar with the basic operation of an infrared camera. Has the recommended experience of thermography to the relevant standards.

Course details	
Duration	35–40 hours.
Structure	Theory and camera practice (hands on) on alternate days with additional laboratory sessions and software exercises on some days.
Exam	Written exam (closed book) including multiple-choice questions and practical image interpretation on the last day. The maximum duration is as defined by the relevant certification standards.
Course fee includes	<ul style="list-style-type: none"> Tuition by an ITC-licensed instructor. Training materials in printed format. Refreshments. Diploma of attendance. Certificate of conformance with certification requirements (subject to passing the exam). Attendance by a group of up to 10 persons. May include more, such as lunch, depending on the location and the organizing body.

Course organization	
ITC	The ITC Category 1 Thermography Course is offered worldwide by ITC subsidiaries and ITC partners as listed in "Courses offered by ITC partners" (T560393). Specific customer requests should be forwarded to the closest ITC subsidiary listed in the "ITC Directory" (1560096).

General description	
This course prepares the student for qualification as a category 2 certified thermographer. The participant will learn about topics in infrared thermography to increase the knowledge about infrared physics, heat science, infrared measurement equipment and its application. As a Category 2 thermographer the participant shall provide guidance to category 1 personnel in the areas of equipment selection, techniques, limitations, data analysis, corrective actions and reporting.	
Note: This part number is reserved for adding additional students to a Category 2 on-site course.	
Content	
<ul style="list-style-type: none"> • Thermal science. • Heat transfer. • Temperature measurement. • Infrared science. • Infrared equipment and applications. 	
Student presentation	
<ul style="list-style-type: none"> • During the seminar, students will present a prepared case study to the class. The maximum duration (excluding discussion) will be 7 minutes, with a maximum of 7 slides. 	
Laboratory sessions	
<ul style="list-style-type: none"> • Newton's law (M). • Advanced emissivity measurement (M). • Variation of emissivity with angle (M). • Transient thermal transfer. • Indirect power measurement (M). • Infrared window transmission (M). • Slit response function. • Hole response function (M). • Parallel circuits. <p>Note: Laboratory sessions denoted by "M" are mandatory.</p>	
Course information	
Available languages	Dutch, English, German, French, Italian, Portuguese (Brazilian), Spanish, Swedish.
Target group	<ul style="list-style-type: none"> • Professional users. • This course is designed for thermographers holding a Category 1 certificate who want to increase their knowledge of infrared thermography and who want to qualify as a Category 2 certified thermographer.

General description	
This is a special course on the specifications of equipment used in particular applications (e.g., triggering or high speed). It addresses predominantly the needs of high-end infrared camera users in scientific or industrial fields.	
Content	
<ul style="list-style-type: none"> Customized. 	
Laboratory sessions	
<ul style="list-style-type: none"> Customized. 	
Course information	
Available languages	English, French. Other languages on request.
Target group	<ul style="list-style-type: none"> Highly specialized users with advanced and scientific applications as well as persons interested in these applications and related infrared equipment.
Typical student	<ul style="list-style-type: none"> Researchers. Scientists. University students.
Prerequisites	<ul style="list-style-type: none"> None.
Recommendations	<ul style="list-style-type: none"> Basic knowledge of thermography and related areas. Experience in measurement techniques and general software skills.
Course details	
Duration	Typically 1 day
Structure	Theory and hands-on sessions, depending on the topics.
Exam	None.
Course fee includes	<ul style="list-style-type: none"> Tuition by an ITC-licensed instructor. Training materials. Diploma of attendance. Attendance by 1 person.
Note	This course is typically organized at the customer's site. The course fee does not include the cost of the instructor's travel or lodging. The customer is responsible for providing a suitable classroom and preferably also refreshments/lunch.

General description	
On-site training that can be customized to your needs. The participants will learn about infrared thermography, inspections, measurements, applications, and reporting corresponding to the level needed for performing measurements and inspection in their working environment. The trainer will give useful advice on how to best implement infrared thermography in your business.	
Content	
<ul style="list-style-type: none"> An on-site course can be any course, from a 1-day introduction to general thermography, to a customized application course, to a complete certification course. 	
Laboratory sessions	
<ul style="list-style-type: none"> Classroom laboratory sessions. On-site field training as agreed with the customer.

General description

This course gives a general introduction to infrared thermography and an overview of its specific use for inspections of electrical systems. It aims to give suggestions on what you can do with your camera. During the first day, you learn the basics of thermography and how to use your camera the best way. The second day you will start with a brief summary of thermal transfer before you learn about electrical systems and components, material properties, and typical problems and faults. Emphasis is placed on case studies, selected from the field.

Content

- Basics of thermography.
- Basics of emissivity and reflected apparent temperature.
- Infrared camera handling.
- Basics of heat transfer.
- Electrical systems.
- Important properties of material.
- Most common problems.
- Case studies.
- Common mistakes.
- Application guidelines.
- Data analysis and reports.

Laboratory sessions

- Emissivity and the reflected apparent temperature.
- Influence of the angle of reflection on the measurement.
- Influence of the object size on the measurement.
- Electrical application laboratory sessions.

Course information

Available languages	English, French, German, Swedish.
Target group	<ul style="list-style-type: none"> • Beginners and anyone interested in infrared thermography and electrical applications.
Typical student	<ul style="list-style-type: none"> • Persons working in the maintenance or installation of electrical systems. • Someone looking to purchase a camera. • Someone who just purchased a camera. • Students and pupils with thermography and building-application-related projects.
Prerequisites	<ul style="list-style-type: none"> • None.
Recommendations	<ul style="list-style-type: none"> • Interest in the technology and its applications.

<http://support.flir.com>

General description

This course gives a general introduction to infrared thermography and an overview on its specific use for inspections of photovoltaic solar systems. During the first day, you learn about the basics of thermography, how a thermal camera works, and how to use it correctly. The second day starts with the basics of photovoltaic solar systems and solar panel installations. You learn about infrared measurements that are critical for solar panel inspections with a thermal camera, how to interpret the displayed thermal images, and how they are associated with typical problems and faults. Emphasis is placed on case studies, selected from the field, as well as on practical exercises.

Content

- Basics of thermography (radiation, spectral waveband, influences of the atmosphere).
- Infrared camera: principles, design and operation (the focal plane array, measurement ranges, thermal tuning: level and span, color palettes).
- Infrared measurement technique: measurement parameters (emissivity, radiation from the environment, distance, relative humidity, atmospheric temperature).
- Infrared camera figures of merit: resolution limits (thermal, spatial, time related).
- Practical exercises.
- Basics of photovoltaic solar systems (terminology, design, principle of operation, module types).
- Solar panel installation: connection types (string, bypass diodes, shadowing).
- Infrared measurements (spectral bands, inspection conditions, spatial resolution, camera position and angle).
- Typical thermal readouts (examples, sources, interpretation—defect/no defect, practical exercises).

Course information

Available languages	English, French, German, Swedish, Italian, Dutch, Spanish.
Target group	<ul style="list-style-type: none"> • Anyone, including beginners, interested in the use of infrared thermography for the inspection of photovoltaic solar systems.
Typical student	<ul style="list-style-type: none"> • Persons working in the maintenance or installation of solar panels. • Thermographers familiar with electrical inspections and interested in solar panel inspections.
Prerequisites	<ul style="list-style-type: none"> • None.
Recommendations	<ul style="list-style-type: none"> • Basic knowledge of electrical installations or another technical field.

Course details

Duration	2 days.
Structure	Theory, camera handling, demonstrations, and practical laboratory sessions.
Exam	None.

General description

This course gives a general introduction to infrared thermography and an overview on its specific use for inspections of photovoltaic solar systems. During the first day, you learn about the basics of thermography, how a thermal camera works, and how to use it correctly. The second day starts with the basics of photovoltaic solar systems and solar panel installations. You learn about infrared measurements that are critical for solar panel inspections with a thermal camera, how to interpret the displayed thermal images, and how they are associated with typical problems and faults. Emphasis is placed on case studies, selected from the field, as well as on practical exercises.

Content

- Basics of thermography (radiation, spectral waveband, influences of the atmosphere).
- Infrared camera: principles, design and operation (the focal plane array, measurement ranges, thermal tuning: level and span, color palettes).
- Infrared measurement technique: measurement parameters (emissivity, radiation from the environment, distance, relative humidity, atmospheric temperature).
- Infrared camera figures of merit: resolution limits (thermal, spatial, time related).
- Practical exercises.
- Basics of photovoltaic solar systems (terminology, design, principle of operation, module types).
- Solar panel installation: connection types (string, bypass diodes, shading).
- Infrared measurements (spectral bands, inspection conditions, spatial resolution, camera position and angle).
- Typical thermal readouts (examples, sources, interpretation—defect/no defect, practical exercises).

Course information

Available languages	English, French, German, Swedish, Italian, Dutch, Spanish.
Target group	<ul style="list-style-type: none"> • Anyone, including beginners, interested in the use of infrared thermography for the inspection of photovoltaic solar systems.
Typical student	<ul style="list-style-type: none"> • Persons working in the maintenance or installation of solar panels. • Thermographers familiar with electrical inspections and interested in solar panel inspections.
Prerequisites	<ul style="list-style-type: none"> • None.
Recommendations	<ul style="list-style-type: none"> • Basic knowledge of electrical installations or another technical field.

Course details

Duration	2 days.
Structure	Theory, camera handling, demonstrations, and practical laboratory sessions.
Exam	None.

General description	
This course bridges the gap between infrared thermography, background science, and applications. The participant will learn the physical concepts of heat transfer and apply them together with relevant building science. After the course, the participant will be able to undertake a qualified building inspections on the basis of existing laws, standards, and regulations.	
Note: This course refers mainly to European building standards. Please consult ITC before selling it in other countries.	
Content	
<ul style="list-style-type: none"> • Introduction to and refresher of infrared basics. • Thermal transfer and wall structures. • Insulating materials. • Humidity, moisture, and the dew point. • Air leaks, pressure profiles, and air permeability. • Survey methodology. 	
Laboratory sessions	
<ul style="list-style-type: none"> • Outside inspection. • Air permeability test (with blower door). • Reporting. 	
Course information	
Available languages	English
Target group	<ul style="list-style-type: none"> • Professional users in building applications who want to become experts in building thermography.
Typical student	<ul style="list-style-type: none"> • Knows how to operate an infrared camera. • Knows how to create a report. • Has a background in a building profession but moderate experience of infrared or has experience in another infrared application field but moderate knowledge of building science.
Prerequisites	<ul style="list-style-type: none"> • Valid Level 1 thermography certificate. • Infrared-related education and experience.
Recommendations	<ul style="list-style-type: none"> • Knowledge of building techniques. • Bring own PC for calculations and exercises.
Course details	
Duration	3 days (24 hours).
Structure	Theory takes place in the mornings. Practical laboratory sessions, calculations, and software exercises are scheduled for the afternoons.

General description	
<p>This course bridges the gap between infrared thermography, background science, and applications. The participant will learn fundamental concepts of heat and chemistry, and how to set up and operate the furnace camera, and to adjust it for environmental conditions related to furnace applications. Laboratory and/or field practice is a key part of this class. Basic inspection procedures will be covered, including equipment setup, route planning, access requirements, safety practices/equipment, and reporting.</p>	
<p>Note: This part number is reserved for adding additional students to an ITC Professional Furnace Inspection on-site course.</p>	
Content	
<ul style="list-style-type: none"> • Introduction. • Working environment (refineries, units, furnaces). • General rules, camera set up and operation. • On-site job organization and related procedures. • Basics of radiative thermal transfer. • Principles and limitations of infrared furnace applications. • Discussion and evaluation of inspection and measurement results. • Methodology. • Reporting. 	
Laboratory sessions	
<ul style="list-style-type: none"> • On-site job organization. • Following the site inspection procedure. • Site measurements. • If possible, field work on site, inspecting real equipment. 	
Course information	
Available languages	English, French.
Target group	<ul style="list-style-type: none"> • Users of FLIR furnace cameras such as the FLIR GF309. • Users of cameras such as the AGEMA 550, Inframetrics 290/390, and FLIR ThermoCAM P25F/P50F. • Qualified thermographers who want to learn more about furnace applications. • Non-thermographers who want to learn how to use furnace cameras or other cameras suited for furnace applications for measurements in their industry.
Typical student	<ul style="list-style-type: none"> • Persons working with furnace applications in the industry and/or with surveillance and/or predictive maintenance and rather moderate knowledge of infrared thermography. • Or persons from other infrared application fields with moderate knowledge of furnace applications and little experience of furnace cameras.

ITC Professional Furnace Inspection—additional student to an on-site course, 1 person (3 days)

General description

This course bridges the gap between infrared (IR) thermography, background science, and applications. Participants will learn fundamental concepts of heat and chemistry, and how to set up and operate FLIR's optical gas imaging (OGI) cameras, and to adjust them for environmental conditions to find gas leaks.

Laboratory sessions and/or field practice in finding leaks are a key part of this class. Basic inspection procedures will be covered, including equipment setup, route planning, access requirements, safety practices/equipment, and reporting. After the course, participants will be able to undertake qualified inspections on the basis of existing laws, standards, and regulations.

Note 1: This course can only be booked via ITC due to camera export restrictions. Please inform ITC if the customer has a medium-wave (MW) or long-wave (LW) OGI camera.

Note 2: This part number is reserved for adding additional students to a gas detection on-site course.

Content

- Introduction.
- Camera set up and operation.
- Thermal science fundamentals.
- Heat transfer.
- IR theory.
- Volatile organic compound (VOC) absorption characteristics.
- Survey and reporting.
- Safety considerations.

Laboratory sessions

- Hands-on and practical exercises during the afternoon of day 2.
- If possible, field work on-site inspecting real equipment. If not, exercises on ITC's specially tailored OGI laboratory equipment.

Course information

Available languages

English.

Target group

- Qualified thermographers who want to learn more about the special applications of volatile gas detection within the petrochemical industry with an MW IR camera.
- Qualified thermographers who want to learn more about the special applications of volatile gas detection for the surveillance of electrical equipment with an LW IR camera.
- Non-thermographers who want to learn how to use their MW IR camera to complement or replace existing leak detection and repair (LDAR) techniques, e.g., in the petrochemical industry.
- Non-thermographers who want to learn how to use their LW IR camera to complement or replace existing LDAR techniques.

General description	
<p>This full 2-day course aims to explain how to set up a procedure for the temperature control of a human population. It is designed for persons who might have to implement a control scenario (medical authorities, customs, civil security, etc.). It starts with a brief, but necessary, summary of thermal transfer and of the fundamentals of thermography. Key factors such as NETD, drift and drift compensation, baseline measurement and updating, and factors influencing the diagnosis are explained in detail. Camera setup is included. ITC recommends organizing the course simultaneously with a full-scale field test (airport, ferry port, seaport, river port, stadium, etc.).</p>	
<p>This part number is reserved for adding additional students to a Human Temperature Measurement on site class.</p>	
Content	
<ul style="list-style-type: none"> • Introduction. • Human physiological factors. • Basic thermography. • Infrared camera basics. • Human temperature measurement methodology. 	
Laboratory sessions	
<ul style="list-style-type: none"> • Emissivity and the reflected apparent temperature. • Camera settings. • Influence of the object size on the measurement. 	

Course information	
Available languages	English.
Target group	<ul style="list-style-type: none"> • Persons with professional interest in human febrile temperature screening.
Typical student	<ul style="list-style-type: none"> • Airline operative personnel. • Reception personnel.
Prerequisites	<ul style="list-style-type: none"> • None.
Recommendations	<ul style="list-style-type: none"> • Basic technical understanding. • Should be organized alongside a full-scale field test.

Course details	
Duration	2 days.
Structure	Theory, camera handling, demonstrations in the morning and practical laboratory sessions.
Exam	None.

ITC Introduction to Human Temperature Measurement—additional student to an on-site course (2 days)
